

JOHN LAWRENCE
1908

OGDENSBURG
NEW YORK

1908.

We again have the pleasure of handing you our New Catalogue for 1908, in which we have tried to describe our stock as it actually is. To those with whom we have had dealings in the past we need only express our thanks for the confidence given us, and assure you that we shall continue to do our best to please. To those with whom we have had no dealings, we extend an invitation to try our stock. Since 1860 we have been growing and handling seeds and plants, and the fact that we have many customers who have been with us for many years, demonstrates that our stock and dealings are satisfactory. We try to give every one a "square deal" and on this basis do an increasing business from year to year. Our constant aim is to learn all the latest facts in regard to the business and keep abreast of the times, having recently made extensive additions to our greenhouse plant, we feel better able than ever to care for our increasing trade, as we have now the largest establishment of the kind in Northern New York. We invite correspondence and promise careful attention to your interests at all times.

Very truly yours,

JOHN LAWRENCE.

PARTIAL VIEW OF OUR GREEN HOUSES.

Flower Seed Novelties

FOR 1908.

NEW ASTERS.

Early Wonder. A magnificent new Aster and one that is bound to become popular on account of its extreme earliness in flowering. The plants are of sturdy branching habit, growing about 15 or 18 inches high, and bear freely its long petaled, perfectly double, pure white flowers on long stout stems, making it very useful for cutting. Per pkt. 15 cts.

New Upright White Branching. This variety is an entirely new form of growth in the Aster family. The flowers resemble the late branching variety in habit and style, being perfectly double, of large size and perfect form, but in the growth of the plants this variety is entirely distinct; the plants grow very compact and branch freely near the ground, producing long stems growing directly upwards, so that well developed plants are not over 8 inches in diameter. They come into bloom considerably earlier than the late branching variety and continue through a long season, making it especially valuable for cutting. Per pkt. 15 cts.

New Upright White Branching Aster.

Vick's Violet King. This Aster is the peer of the grandest Chrysanthemum, with the advantage of easy culture and continuous and prolific blooming throughout a long season. The plants are of the same vigorous habit and luxuriant growth as the late branching variety, but in form of flower is entirely distinct. The petals somewhat resemble the quilled varieties, but are much larger and broader, those in the center being peculiarly twisted and incurved completely covering the crown. The bloom is large, full and very double, many of the flowers measuring five inches in diameter. The color is a rich shade of violet. Per pkt. 15 cts. One pkt. each of the new varieties for 35 cts.

New Orchid-Flowered Sweet Peas.

This distinct type is the largest in size of all Sweet Peas. The flowers are of unusual size and substance, of a wavy and fluted appearance and produce their large beautifully formed flowers on long stout stems.

Countess Spencer. A grand large flower of fine form and beautiful coloring. The flowers are not only of very large size, but are distinct in having the outer edges of the standard and wings beautifully crumpled or wavy. The standard is broad and tall; the wings are broad, well spread, and held erect. The coloring is a silvery white, suffused with soft rose-pink, which deepens at the outer edges. The plant is a strong vigorous grower, and the large flowers are usually borne three and four on a stem. Per pkt. 10 cts.

Evelyn Byatt. Without doubt the richest colored Sweet Pea yet introduced. The standard is a rich orange-salmon, while the wings are slightly deeper in tone. The whole flower has a rich fiery orange color, which is decidedly attractive. Per pkt. 10 cts.

Gladys Unwin. A large bold flower with striking upright crinkled or wavy standards and broad wings. The flower is somewhat similar to Countess Spencer, but several shades deeper in its lovely pink color. Per pkt. 10 cts.

Helen Lewis. A grand orchid-flowering variety of the Countess Spencer type. The orange rose wings roll and fold; the standard is reflexed, showing the distinctly fluted effect, and is of an intense rich crimson orange color. The flowers are of very large size, the standards frequently measuring two inches across. Per pkt. 10 cts.

Helen Pierce. This variety, while not of the orchid flowering type might be called the first of a new Gloxinia-flowered type. The color is a bright blue, mottled on pure white. It does not show any suggestion of stripe, but uniformly marbled or peppered with the color. This peculiar coloring resembles that of the blue mottled Gloxinia. It bears three and frequently four flowers on a stem; of good size and perfect form. Per pkt. 10 cts.

John Ingman. This is the deepest color existing in this grand new race. The beautifully fluted flowers, of truly gigantic size, are a rich carmine rose in the standard, with wings of a deep rosy pink. The effect is that of a self color. The rich warm shade is both bright and pleasing, of strong growth and the vines bloom profusely. Per pkt. 10 cts.

Nora Unwin. A pure white variety with wide open flowers on long stems, very free flowering, and a close second in every respect to that grandest of all varieties, White Spencer. Per pkt. 10 cts.

White Spencer. This variety is in a class by itself and certainly far surpasses all other whites. Its flowers are produced in the greatest profusion, are of enormous size, and absolutely pure white. The standards are decidedly waved, fluted and frilled, and frequently measure two inches across; the wings are nearly an inch wide and nearly as deep as the standard. The flowers are usually borne three and four to the stem, which is extra strong and usually 12 to 15 inches in length. The vines are most vigorous in growth with heavy foliage and attain a height of 10 to 12 feet. In sealed packets of 25 seeds, 25 cts. each.

Collection of nine varieties for 85 cts.

NEW AND RARE PLANTS.

NEW CARNATIONS.

Beacon. The finest and freest blooming variety ever introduced. It is one of the first to come into bloom and continues in full crop all through the season. The flowers under ordinary culture average about three inches in diameter. The guard petals are broad, well arranged, and of good substance; the center not too full and loosely built.

Winsor. Nothing approaches this in color, which is a clear silvery pink, a color that has long been wanted in the Carnation; the flowers are large and freely produced on long stems.

White Enchantress. A pure white sport of the well-known and popular 'Enchantress' with all of the good points of that variety, absolutely pure in color and will prove a leader in white Carnations.
Strong plants from 2 inch pots, 15 cts. each.
Strong plants from 3 inch pots, 20 cts. each.

NEW DAHLIAS.

Amos Perry. One of the earliest of the Cactus type and one of the freest blooming. The flowers are very large with long tubular petals; color, fiery red. 25 cts. each.

Floradora. A grand new Cactus Dahlia of remarkably free flowering habits. The plant is a strong grower, producing its large distinct blood-red flowers on long stems, making it invaluable for cutting.
Strong plants from pots, 20 cts. each.

Florence M. Stredwick. A fine white Cactus variety of large size, perfect form, and great substance, flowers lasting in good condition for two weeks.
Strong plants from pots, 20 cts. each.

Fire Rain. A valuable addition to the list of decorative varieties, both for general display or for cutting. In this new variety, which was sent out by a German specialist, we have not only the rich cardinal red color, which is now so popular, but a plant that produces masses of bloom early and continuously throughout the season.
Strong plants from pots, 20 cts. each.

Goetlinde. An early and free blooming Cactus variety, of perfect form; color, a beautiful primrose yellow. Strong plants from pots, 20 cts. each.

Mrs. Clinton. A Cactus variety of peculiar and delicate coloring which is admired by everyone. The ground color is deep amber, gradually shading to a rosy scarlet, with a glow and finish almost impossible to describe. 25 cts. each.

One plant each of the six varieties for \$1.00.

DAHLIA—Goetlinde.

NEW OSTRICH PLUME FERN.

New Ostrich Plume Fern.

Strong young plants, 25 cts. each.
 Fine plants from 5 inch pots, 50 cts. each.
 Specimen plants, 1.00 to \$3.00 each, according to size.

Nephrolepis Whitmanii. One of the latest and best additions to the list of Boston Ferns. In this variety the pinnae or leaflets on the individual fronds are so finely divided, that it reminds one of a piece of fine lace. The fronds are broad, dense and graceful. The habit of the plant is perfect, being of a robust growth, and quickly growing into fine specimens. We have a fine stock and are able to offer them at the following prices:

Baby Rambler Rose.

NEW ROSES.

Baby Rambler. A very popular addition to the list of bedding Roses. It is a seedling of the well-known Crimson Rambler, but, instead of the climbing habit of that variety, it produces dwarf compact bushes about 18 inches in height, with clean light foliage, which is remarkably free from insect troubles or disease. The most remarkable feature of this variety is its freedom of bloom, being never out of bloom from early spring until heavy frosts. The flowers are of the same rich shade of crimson as the parent.

Strong plants from 1 inch pots, 25 cts. each.

Large plants from 5 inch pots, 50 cts. each.

Annie Muller. (The Pink Baby Rambler.) A new variety which will undoubtedly become as popular as the original Baby Rambler. It is almost identical in growth and habit, with the original variety, except in color which is a brilliant luminous pink which is always admired. Strong plants 50 cts. each.

VEGETABLE SEED SPECIALTIES.

BEAN.

Improved Golden Wax Bean.

Improved Golden Wax. Probably the most popular variety of Dwarf Bush Wax Beans, and although introduced in 1876 is undoubtedly superior to any variety in its class today. It is practically rust proof, very early

and productive, with long broad fleshy pods of a rich golden yellow color, cooking quickly as a snap bean or equally good as a shad bean. Pkt., 10 cts.; pint, 20 cts.; qt., 30 cts.; peck, \$1.75; bu., \$6.50

Crimson Globe Beet.

NEW BEET.

Crimson Globe. A remarkably fine variety on account of its smooth skin and fine shape. We have had it on trial for several seasons and find it desirable in every respect. It is a medium early variety, does not grow large and coarse, and the flesh is sweet and tender. The color is a rich dark red.

Pkt., 5 cts.; oz., 15 cts.; lb., 50c.

NEW CUCUMBER.

Davis' Perfect Cucumber.

Davis' Perfect. This new variety beats all others in point of beauty, quality and productiveness. It loads its vines so heavily that it seems almost impossible for them to mature their fruits, which are of a beautiful dark green color of handsome shape and of the finest quality, bringing the highest prices in the large city markets. One of the finest varieties for slicing and equally good for pickling. Pkt. 10 cts.; oz., 20 cts.; $\frac{1}{4}$ lb. 50c.

ONION.

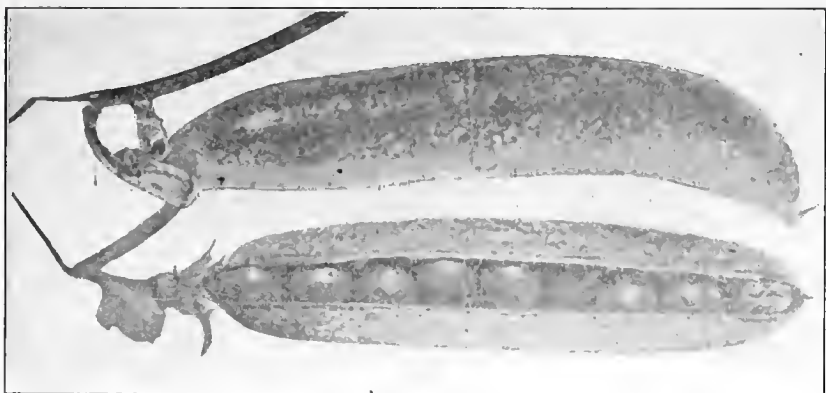

Select Yellow Globe Danvers.

Select Yellow Globe Danvers. The finest shaped, best colored and largest cropper of any of the standard varieties. Our strain of this popular variety is not to be compared with the ordinary seed offered by most seedmen, but has been grown from only selected bulbs and everything rejected which does not come up to standard in size, shape and uniform coloring. Our strain is remarkable for its size, shape and earliness in ripening and will yield more marketable onions to the acre than any other strain that we know of.

Pkt. 5 cts.; oz., 25 cts.; $\frac{1}{4}$ lb., 80 cts.; lb., \$3.00.

NEW EARLY PEA.

Gradus or Prosperity.

Gradus or Prosperity. The largest podded early Pea. A variety of great merit that has become wonderfully popular the past few years on account of its enormous pods, earliness and delicious flavor. Of very vigorous habit and productive to a marked degree; invaluable for the home or market garden; height about 3 feet. Pkt. 10 cts.; pt., 20 cts.; qt., 35 cts.; peck, \$2.00.

NEW SWEET CORN.

Golden Bantam. Undoubtedly the best extra early variety of real Sweet Corn ever introduced. The growth of the plants is dwarf, averaging only about four feet in height, the ears are from 5 to 7 inches in length, but what it lacks in size is more than made up in quality and productiveness. The distinct color, which is a golden yellow, is so unusual that many persons seeing it for the first time ask if it is really a Sweet Corn, but a single trial of its splendid quality soon convinces them that it actually is the finest flavored of all Sweet Corns. It is especially valuable for the Northern States as on account of its hardiness it can be planted a week or ten days earlier than the other varieties of Sweet Corn. Pkt. 10 cts.; $\frac{1}{2}$ pint, 15 cts.; pint, 25 cts.; qt., 40 cts.

VEGETABLE SEEDS.

In the following list will be found a selection of the best standard varieties of Vegetable Seeds. Our prices are as low as the lowest, considering quality. There are cheaper seeds, but the best seeds are the cheapest in the end. We do not list an extended variety, but only those which in our long experience we have found the best and most distinct for this locality. We have for the past twenty years supplied many of the market gardeners in this section with seed in large quantities, and in every case they have given the best satisfaction.

Special prices will be quoted on application, to large planters and market gardeners using large quantities of seeds.

Free by Mail. All seeds in packets, ounces and quarter pounds are sent postage paid. Postage will be charged at the rate of 8 cents per pound on one-half pound and upward of one variety. Peas and Beans at the rate of 15 cents per quart.

ASPARAGUS.

Conover's Colossal. The standard variety, shoots of the largest size, good quality and very productive.

Pkt. 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 20 cts.; 1 lb., 50 cts.

Columbian Mammoth White. A new variety, producing large white stalks of the finest quality.

Pkt. 5 cts.; oz., 10 cts.; $\frac{1}{4}$ lb., 20 cts.; 1 lb., 60 cts.

BEANS.

Improved Round Pod Valentine. The standard green podded variety. Very early and prolific, pods remarkably tender and fleshy.

Pkt. 10 cts.; pint 20 cts.; quart 35 cts.; peck \$1.10; bushel \$4.00

Stringless Green Pod. A grand early green podded variety and superior to any other variety grown. It is very productive, the pods are long, very fleshy and solid, and are of a beautiful shade of green and absolutely stringless, even when fully matured. Positively the best and earliest green bush bean grown.

Pkt. 10 cts.; pint 20 cts.; quart 30 cts.; peck \$1.75; bushel \$6.50.

Wardwell's Kidney Wax. One of the best wax beans, of strong upright bush growth, bearing long flat pods of a delicate, waxy yellow, very tender and absolutely stringless, very productive.

Pkt. 10 cts.; pint 20 cts.; quart 30 cts.; peck \$1.75.

Henderson's Bush Lima. The most valuable variety for this climate. Very early, being fit to use weeks ahead of the old pole Limas; very productive and of excellent quality.

Pkt. 10 cts.; pint 20 cts.; quart 30 cts.; peck \$1.75.

Henderson's Bush Lima. The most valuable variety for this climate. Very early, being fit to use weeks ahead of the old pole Limas; very productive and of excellent quality.

Pkt. 10 cts.; pint 20 cts.; quart 30 cts.; peck \$1.75.

Seibert's Large Early Lima. A very early and prolific strain of large Limas, and the only variety that can be depended on to produce a crop in this latitude. The pods are of medium length and well filled with large, fleshy beans of the finest flavor.

Pkt. 10 cts.; pint 20 cts.; quart 35 cts.

BEETS.

Crimson Globe. A remarkably fine variety on account of its smooth skin and fine shape. We have had it on trial the past two seasons and find it a very desirable variety. It is a second early, does not grow large and coarse, and the flesh is sweet and tender. The color is a rich dark blood red. The tops are small and dark in color.
Pkt. 5 cts.; oz. 15 cts.; lb. 80 cts.

CROSBY'S EGYPTIAN—SELECTED STOCK.

Crosby's Egyptian. An improved form of the early Egyptian. An extra early variety of fine quality, uniform size and perfect shape.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

Detroit Dark Red. A very choice variety of globular shape and small tops, skin and flesh bright red, tender and sweet.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

Eclipse. Smooth and round; fine grained and of excellent quality. Very early. The best for table use.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 60 cts.

CABBAGE.

Early Winningstadt. An old favorite, good for early or late use; pointed head. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.

Early Jersey Wakehead cabbage.

Early Jersey Wakefield. The standard early variety. More of this variety is planted for early market than all other early varieties combined.

Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75c.

All Head Early. The earliest of the large heading or drum head cabbage. The heads are deep and solid, very uniform in size and of excellent quality.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75c.

Short Stem Drumhead. A fine main crop variety, very short stem and compact growth. The heads are large and solid and very uniform in size and shape.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 70 cts.

Premium Flat Dutch Cabbage.

grown for shipment to distant markets. It is of medium size, round as a ball, as hard as a rock, and an excellent keeper.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts.

Autumn King. Esteemed by many as the finest late cabbage for Fall and Winter use. It is extremely large, frequently weighing 25 pounds when grown in good soil. Very solid and an excellent keeper.

Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

Red Dutch. The popular red pickling variety. Pkt. 5 cts.; oz. 20 cts.

CARROT.

Danver's Half Long. A handsome orange colored carrot of large size and fine quality. Will yield the greatest weight per acre, with the shortest length of root, of any other variety.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 75 cts.

Early Oxheart or Guerande. A desirable early variety with short thick roots of excellent quality. A grand variety to grow in heavy soil.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

Improved Short White. The best of the white varieties. Very thick crisp roots of excellent quality. A great yielder.

Pkt. 5 cts.; oz. 10 cts.; 1 lb. 50 cts.

CAULIFLOWER.

Extra Early Dwarf Erfurt. Very dwarf and early, very few plants fail to produce solid pure white heads of the finest quality.

Pkt. 15 cts.; $\frac{1}{4}$ oz. 60 cts.; oz. \$2.25.

Large Late Algiers. A strong growing late variety, producing large, solid white heads late in fall.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 40 cts.; oz. 75 cts.

Premium Flat Dutch.

The standard winter variety, very large and solid, and an excellent keeper.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.; 1 lb. \$1.50.

Surehead. A later variety noted for its reliability in heading. The heads grow large, firm and fine in texture and weigh from 10 to 15 lbs. each. Excellent keeper.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts.

Danish Ball Head.

This hard-headed variety originally came from Denmark where it is largely

Selected Early Snowball Cauliflower.

Selected Early Snowball. The best and earliest strain of this popular variety. Under favorable conditions nearly every plant will make a fine head. There are many strains of this variety offered, but we find by experience that this is better than any we have ever tried.

Pkt. 15 cts.; $\frac{1}{4}$ oz. 75 cts.; oz. \$2.50.

Golden Self Blanching Celery.

CELERY.

White Plume. The standard early variety. On account of its white leaves and stalks it requires very little earthing up to blanch it.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.

Golden Self Blanching. A beautiful rich golden yellow variety, which is solid, crisp and of a rich, nutty flavor, and a grand keeper.

Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00.

Giant Pascal. An extra large variety and the best for winter use. The stalks are very large, solid, crisp and of the richest nutty flavor.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.

Winter Queen. A grand winter Celery that is becoming very popular on account of its compact sturdy growth, rich, nutty flavor and excellent keeping qualities.

Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 75 cts.

New Rose. Solid and crisp, stalks a beautiful light rose color. A late keeper and surpasses the white varieties in richness of flavor.
Pkt. 5 cts.; oz. 25 cts.

CORN.

White Cob Cory. An improvement of the Cory corn, with white cob and kernels. It is fully as early as the older variety, with ears of larger size.
Pkt. 5 cts.; pt. 15 cts.; qt. 25 cts.; peck \$1.50; bushel \$5.00.

Early Crosby. A favorite early variety, coming right in after Cory. Very productive, ears medium sized and of a rich, sugary flavor.
Pkt. 5 cts.; pt. 15 cts.; qt. 25 cts.; peck \$1.50; bushel \$5.00.

Squantum, or Potter's Excelsior. A fine second early variety, and one of the sweetest and most productive; ears medium size.
Pkt. 5 cts.; pt. 15 cts.; qt. 25 cts.; peck \$1.50; bushel \$5.00.

Country Gentleman. One of the finest varieties for table use. The ears are eight to ten inches long, cob very small and kernels of great depth; quality delicious.

Pkt. 5 cts.; pt. 20 cts.; qt. 30 cts.; peck \$2.00.

Country Gentleman Corn.

Early Evergreen. This excellent new variety ripens ten to twelve days earlier than the well-known and popular old Stowell's Evergreen and is equally as good for all purposes. The kernels are sweet and tender and remain a long time in good condition to use. The ears are almost as large as the Stowell's with the same deep, narrow kernels as that variety.
Pkt. 5 cts.; pt. 20 cts.; qt. 30 cts.; peck \$1.75; bushel \$6.50.

Stowell's Evergreen. The standard late variety for home use or market. Ears very large, completely filled with large deep kernels of the finest flavor. Pkt. 5 cts.; pt. 20 cts.; qt. 30 cts.; peck \$1.75; bushel \$6.50.

CUCUMBER.

One ounce will plant fifty hills; two pounds will plant one acre.

Everbearing. A valuable variety, very early and productive. If the fruits are kept picked the vines will continue in bearing throughout the season. The fruits are of medium size, dark green in color and of excellent quality. A favorite with many for pickling.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

Cumberland Pickling. The fruits are of handsome appearance, straight and symmetrical and set with fine spines over the entire surface. The flesh is firm, crisp and tender, with a fine flavor. An excellent variety for slicing or for pickles.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

Early White Spine. The most popular variety for table or market. Very early, productive and of excellent flavor.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Chicago Pickling. The best variety for pickles; very productive, medium sized, deep green fruits.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 60 cts.

Extra Long Green Cucumber.

Extra Long Green. A fine variety producing smooth regular fruits ten to twelve inches long, of excellent quality, producing very few seeds. A valuable variety for table or market purpose.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

EGG PLANT.

New York Improved. The leading market variety, very large, productive and of good quality. Pkt. 10 cts.; oz. 35 cts.

LETTUCE.

Boston Market. The earliest heading variety; fine large smooth leaves; excellent for planting in hot beds or first crop in the garden.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 35 cts.

Big Boston. A very popular large heading variety, equally good for hot bed or garden. It heads well in the open ground during the Spring and Fall, and is quite tender and solid.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

Black Seeded Simpson. Large loose heads of tender golden yellow leaves. One of the best for forcing.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Wonderful. Large white heads frequently weighing 2 or 3 lbs. each; very crisp, rich and tender; one of the best for summer planting.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

Grand Rapids. The best variety for forcing for market. It matures quickly, and retains its freshness a long time after being cut. Very large loose head. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

MUSK MELONS.

Defender. Handsome in appearance, oval in form; of regular, even size and finely netted. They are medium in size, averaging seven inches in length and have a diameter of about five inches. The flesh is salmon colored, firm, fine grained, rich, and of excellent flavor, and retains its quality to the very shell. The vines are vigorous and productive.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

Improved Jenny Lind. The Jenny Lind Musk Melon has long been known for its extreme earliness and free bearing qualities. This improved strain will be found to be equally as early and productive, but with larger and finer flavored fruits. On account of its extreme earliness, it should be largely planted in this section.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Bay View. Very large oblong fruits, about a foot in length and six inches in diameter. The fruits have broad heavy ribs well netted, and light green flesh of good flavor.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Paul Rose. One of the best Musk Melons introduced in many years. Very early, extra quality, thick salmon colored flesh, and very productive. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Rocky Ford Musk Melons.

Rocky Ford. An improvement on Netted Gem. Very early; delicious deep green flesh, ripening close to the rind; medium size. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; 1 lb. \$1.00.

Montreal Market. The largest of the Nutmeg varieties. Very large, almost round, quality delicious; flesh green and very deep; early and productive. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.;

WATERMELONS.

Cole's Early. Absolutely the best and earliest variety for our Northern climate. The flesh is bright red, delicate in texture while the flavor is equal to if not superior to the best of the improved Southern varieties. The vines are vigorous and productive, producing good size melons with a thin rind. Our seed has been saved from the earliest and best fruits and has been grown in this northern climate. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Phinney's Early Watermelons.

Fordhook Early. The earliest large melon, and as good or better than the large southern varieties; flesh bright red of fine flavor, and very sweet; color plain green.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Phinney's Early. A very early variety; medium and uniform size, and a beautiful form. The skin is smooth, with white mottled and dark green stripes. Flesh light red or pink, sweet and delicious. One of the very best for home use. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

Hungarian Honey Improved. An excellent variety that will easily mature its fruit in the North. The Melons grow nearly round in shape, skin dark green, flesh rich red with delicious flavor, very sugary melting. While not large enough for market purposes, it is one of the best for home use on account of its quality.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Kleckley's Sweet. A good variety, unsurpassed for home use. The fruits are oval in form, dark green in color, with bright scarlet flesh and exceedingly sweet. This variety is so crisp and tender it will not stand shipping. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Citron. A large fruiting strain for preserving; flesh white and solid.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

ONIONS.

Extra Early Red. An abundant yielder and a good keeper. The bulbs are medium size, rich red color solid and heavy; being a flat variety they will mature in cold heavy soil better than most varieties.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00.

Red Wethersfield. The standard large red variety, almost round; fine grained and a good keeper.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.25.

Yellow Danvers. A selected strain combining earliness with very large yield. A grand market variety and can be grown in most locations where globe-shaped varieties will not ripen. Bulbs are flat with pale yellowish skin with crisp white flesh of mild flavor.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts.; lb. \$2.75.

Large White Globe Onion.

Australian Brown. It is very quick to mature, ripening two or three weeks earlier than the old varieties. Its keeping quality is remarkable, keeping in good condition when all other varieties are gone. The bulbs are medium to large in size and shape, and mild in flavor.

Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.; 1 lb. \$2.25.

Yellow Globe Danvers. The standard yellow variety; an excellent keeper and very productive; true globe shape and uniform size.

Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 80 cts.; 1 lb. \$3.00.

Large White Globe. Pure white, true globe shape, mild flavor and a good keeper. Pkt. 5 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.10; lb. \$4.00.

Mammoth Prizetaker. A variety of immense size, pale yellow in color, mild flavor and an immense yielder.

Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 70 cts.; 1 lb. \$2.50.

White Portugal. A standard variety on account of its early ripening qualities. A good keeper and mild and sweet in flavor. When seed is sown thickly and not thinned, is very desirable for pickles.
Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.00.

PARSNIP,
Hollow Crown.

PEPPER—Long Red Cayenne.

ly growing over 10 inches high and very productive. The pods are one-third larger than American Wonder and are well filled with large peas of large size and unusually sweet flavor.
Pkt. 5 cts.; pt. 20 cts.; qt. 30 cts.; peck \$1.60; bushel \$6.00.

Little Gem. An early wrinkled variety of excellent quality, growing about eighteen inches high; very prolific.
Pkt. 5 cts.; pt. 20 cts.; qt. 25 cts.; peck \$1.25; bushel \$5.00.

PARSLEY.

Moss Curled. A compact growing variety, beautifully curled and crimped, excellent for garnishing or flavoring.
Pkt. 5 cts.; oz. 10 cts.

PARSNIP.

Hollow Crown. The best for general use. Large, smooth roots of uniform size. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; 1 lb. 40 cts.

PEPPER.

Chinese Giant. The finest and largest variety of mild flavor. The flesh is universally mild, very sweet and of great thickness. The plants are very productive, frequently half a dozen peppers on a single stem. The fruits are of thick, blocky form and bright scarlet in color.
Pkt. 10 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 40 cts.

Bell or Bull Nose. A large early variety of mild flavor. The standard for baking and pickling.
Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts.

Long Red Cayenne. Large, bright red and full of fire; used principally for pickling.
Pkt. 5 cts.; oz. 25 cts.

Golden Queen. The best yellow variety; very large and uniform in size, mild flavor.
Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{2}$ lb. 75 cts.

GARDEN PEAS.

Alaska. One of the earliest, large round pods, well filled with peas of the finest quality; seed blue.
Pkt. 5 cts.; pt. 15 cts.; qt. 25 cts.; peck \$1.35; bushel \$5.00.

Nott's Excelsior. The best early dwarf variety and much better in every respect than American Wonder.

The growth is very compact, rarely

Heroine. A second early green wrinkled variety and one of the best for home use or market. Pods very large and filled with extra large peas of the finest quality; very productive.
Pkt. 5 cts.; pt. 15 cts.; qt. 25 cts.; peck \$1.50; bushel \$5.50.

Surprise or Eclipse. This variety is one of the earliest of the wrinkled sorts. The vines grow about 18 inches high and are thickly set with round well filled pods, two and a half to three inches in length, the peas long remain tender and sweet.
Pkt. 5 cts.; pt. 20 cts.; qt. 30 cts.; peck \$1.75.

Stratagem. One of the best late or main crop varieties. Pods of immense size filled with very dark green peas of the finest quality.
Pkt. 5 cts.; pt. 15 cts.; qt. 30 cts.; peck \$1.85.

Telephone. A tall growing variety, with very large pods well filled with large peas of delicious flavor. It comes into bearing soon after Little Gem and continues for quite a long time.
Pkt. 5 cts.; pt. 25 cts.; qt. 30 cts.; peck \$1.75; bushel \$6.50.

Marrowfat. The well known late variety, standing the heat of summer better than most other varieties.
Pt. 10 cts.; qt. 15 cts.; peck 85 cts.; bushel \$3.00.

PUMPKIN.

Sugar. Medium sized remarkably sweet, fine grained and dry, very productive. The best for pies.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Mammoth or Field. Immense size, good quality, and very productive.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 45 cts.

RADISH.

Early Scarlet Turnip. A quick growing variety, with small top; rich color; crisp and tender.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Early Round Red. Very early, skin brilliant red, flesh white, solid, crisp and very mild.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 65 cts.

Earliest White Olive. Of handsome olive shape, with white skin and flesh, and clear, mild flavor. Very early, being ready for use in about 21 days from sowing the seed.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Crimson Giant. One of the most remarkable new varieties that has ever come to our notice. It combines earliness with large size and does not become spongy even when fully twice the size of other varieties. The flesh is firm, crisp and tender. The color is beautiful carmine crimson. We strongly recommend this variety for hot beds as well as for gardens. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 75 cts.

Scarlet Globe. An extra fine variety, slightly oval in form, of superb quality; flesh white and tender and rich bright scarlet in color.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Early Long Scarlet. The standard early long variety. The radishes are long, of even red color, and very attractive in appearance. The flesh is crisp, tender and of mild flavor.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

French Breakfast. A splendid olive shaped variety, of medium size, very crisp and tender; red, tipped white. One of the best.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 60 cts.

Scarlet Turnip White Tip. Deep scarlet, with white tip; very early; with small top. Very attractive in appearance.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 65 cts.

SALSIFY. or VEGETABLE OYSTER.

Sandwich Island. One of the most nutritious vegetables and should be more generally grown. The culture is the same as for Carrots or Parsnips. The plants have a grassy top and long tapering root and resemble a slim Parsnip. The roots having been boiled and fried resemble oysters in flavor.
Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.; 1 lb. \$1.25.

SPINACH.

Long Standing. This is decidedly the best for spring sowing, as it stands fully two weeks longer than any other sort before running to seed. The leaves are large, thick, fleshy and crumpled.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; 1 lb. 35 cts.

Round Thick Leaved. One of the most popular with our market gardeners; leaves large, thick and fleshy; excellent for fall sowing, being very hardy.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; 1 lb. 35 cts.

SQUASH.

Summer Varieties.

White Bush Scallop. Of true bush growth, very early and productive, with large, thick, waxy white fruits of superb flavor.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 75 cts.

Giant Summer Crookneck. The most popular variety; early, productive and of excellent quality; grows in bush form.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 35 cts.; 1 lb. \$1.00.

Winter Varieties.

Delicious. This new Fall and Winter Squash is finer grained and more delicious than the well-known Hubbard. The color of the skin is green, with an occasional blue specimen; size about same as Hubbard, weighing from 5 to 10 pounds. For table use, either as a Fall or Winter Squash, it cannot be excelled, the flesh being remarkably thick, fine grained, sweet and of rich flavor. The best specimens of "Delicious" are naturally equal to other Squashes after they have had the addition of sugar, eggs and milk.
Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

Golden Hubbard. Shape same as old-fashioned Hubbard, but skin is rich orange color. The flesh is deep golden yellow, cooks dry, fine flavor. The keeping qualities are fully equal to the old variety.
Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 30 cts.; 1 lb. \$1.00.

Hubbard. The old favorite winter variety. Very large, flesh yellow, very dry, sweet and fine flavored.
Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 25 cts.; 1 lb. 90 cts.

Boston Marrow. A very productive variety, with bright orange skin and flesh. A good variety for winter use and excellent for pies.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; 1 lb. 75 cts.

TOMATO.

Dwarf Champion. An early and distinct variety, growing stiff and upright in form and requiring no support. Fruit medium size, perfectly smooth, bright purplish red in color and very productive.
Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

Chalk's Early Jewel Tomato.

Chalk's Early Jewel. Almost as early as Earliana, but the fruits are larger, more solid and thicker. The plants are very vigorous and extremely productive. It is one of the most profitable varieties for main crop as well as extreme earliness. This variety is claimed by many to be as early as Earliana, but in our trials it was only a few days later.
Pkt. 10 cts.; oz. 30 cts.

Sparks' Earliana. Again this variety has come out ahead in our trials the past season in comparison with all the early varieties offered by the leading seedsmen. It is not only remarkable for its extreme earliness, but also for its smooth, uniform shape and solidity. It is of large size while in quality it is the equal of any variety grown. Reports from growers in all parts of this country and Canada confirm the statement—The earliest variety in existence.
Pkt. 10 cts.; oz. 35 cts.

Quarter Century. A new dwarf growing upright variety very similar in growth to the Dwarf Champion, but surpassing that variety in size, solidity and quality of fruit. The fruits are large, smooth, free from cracks, and intense deep red in color. It is an early and abundant bearer and will produce as much fruit per acre as the larger growing varieties. Pkt. 5 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00.

Dwarf Stone. The largest fruited of all dwarf varieties; of the same stout, sturdy growth as the Dwarf Champion, but far more productive, of large size, thick, meaty fruits. The plants are quite hardy and the blossoms set freely in cool weather. They are bright scarlet in color, very uniform in shape and of excellent quality.
Pkt. 10 cts.; oz. 40 cts.

Livingston Beauty. The standard market variety in this locality. Large smooth and solid; very productive.
Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

Ponderosa. The largest variety in cultivation; very smooth, solid and meaty.
Pkt. 5 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.20.

Matchless. A splendid main crop variety. Fruits are very large, solid, perfectly smooth and of fine quality, very productive.
Pkt. 5 cts.; oz. 40 cts.; $\frac{1}{4}$ lb. \$1.25.

Store. The heaviest and most solid of all the large, smooth, main crop varieties. Vines vigorous and productive; fruit large, round, deep red in color and good quality.
Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.

TURNIP.

Purple Top Strap Leaf. An early white fleshed variety of mild flavor and rapid growth.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; 1 lb. 50 cts.

White Egg. Very early, of handsome oval form, pure white skin and sweet, firm, mild flesh.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

Ruta Baga—Long Island Improved. The best variety. Very large with firm yellow flesh, of good quality; good for table use or stock feeding.
Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts.

Monarch. A grand yellow fleshed variety, with very large, smooth roots and small neck and top. Flesh solid, fine grained and of the very best flavor. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts.

MANGEL WURZEL.

Mammoth Long Red. The standard variety for stock feeding. Long roots of enormous size, smooth and regular in shape, with small top.
Oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; 1 lb. 50 cts.

HERBS.

Caraway. Cultivated for the seeds, which are used in cakes, confectionery and medicine.
Pkt. 5 cts.; oz. 10 cts.

Sage. The most generally used of all herbs for flavoring and dressing.
Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; 1 lb. \$1.40.

Summer Savory. The well-known and indispensable herb for seasoning, etc. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Lawrance's Lawn Grass Seed.

Nothing is more important in the making of a fine lawn than the proper grass seed. Good results only are obtained by the proper combination of the most suitable grasses adapted to this climate. Our mixture embraces only such varieties as are hardy in this northern climate and will produce a thick, permanent sod which will improve and retain that rich velvety appearance which is so desirable in a fine lawn. We have it in packages, with full directions for making a fine lawn.

1 quart, package 15 cts.; peck 85 cts.; bushel \$3.00. If by mail add 8c. per quart for postage.

Sward Food.

A fertilizer especially prepared to feed grasses and insure a thick matted growth of rootlets, resulting in a compact and velvety turf. It also acts as a preventative and destroyer of the Antler or grass moth, and contains in soluble form the organic requisites for the healthy and luxuriant growth of all varieties of grasses. It is equally valuable for Ferns and Flowering Plants, Melon Crops, Cabbage and Corn.

5-pound bag, 25 cts.; 10 pound bag 50 cts.; 25-pound bag \$1.10.

Do not cover your lawn with unsightly stable manure. Use **SWARD FOOD**.

We are in receipt of many communications complimenting the quality of stock, mode of packing, and liberal court, from numerous patrons of past seasons.

Should you have friends who require plants, we will gladly forward them our Catalogue on receipt of their address.

FLOWER SEEDS.

We give special attention to our Flower Seeds and aim to handle only the best strains to be procured, both of home and foreign growth. We do not offer a long list of varieties, but only the best and most generally known, and those we know are best suited to the amateur. We offer no seeds of inferior quality, at cheap prices, nor do we give any premiums, preferring to give the value in the best seeds procurable at honest prices. Many of the varieties are of our own growing and most careful selection, while others are from specialists in this and foreign countries.

GENERAL RULES.

Many of the failures with Flower Seeds are due to the lack of proper conditions, such as sowing too deep, too early, too late, in improperly prepared soil, etc. and while it would be impossible to give explicit directions in our limited space, we give a few general directions, which, if followed, will give only good result. For all seeds which should be started early in the house, such as Carnation Marguerite, Cockscomb, Coleus, Canna, Heliotrop, Petunia, Verbena, &c., the best plan is to sow in shallow boxes, pans or anything of convenient size and having good drainage. These should be filled about half their depth with broken crockery, coal ashes, or any material which will allow the water to drain away freely. The upper half should be filled with nicely sifted soil composed of about one-third sand, one-third leaf mold or well-rotted manure, and one-third good garden soil. Press the soil down level and firm and water thoroughly several hours before sowing the seeds. When ready scatter the seeds thinly over the surface and cover them with finely sifted soil to a depth of about four times the diameter of the seeds. This means with very fine seed such as Petunia, a covering of about one-thirty-second of an inch, while with such large seed as Canna, a covering of nearly an inch would be necessary. After covering, firm the soil again and water just enough to reach the seeds. The best plan in watering is to place the box or pan in a larger vessel containing water enough to reach about half the depth of the box, and leave until the soil is saturated; the box can then be covered with a pane of glass or papers to hold the moisture. When the seedlings appear all shading must be removed and they must now have plenty of light and air. The soil at no time must become dry, as this is the most critical time, and any lack of attention at this time may mean an entire failure. When the seedlings are large enough to handle they should be transplanted into similar boxes or small pots and kept in a light, airy situation until time to plant out in the open ground.

For all hardy annuals such as Alyssum, Candytuft, Mignonette, Poppies, etc., the simplest plan is to sow the seeds directly in the open ground. When the soil is in good working condition, it should be well dug and the surface raked fine. Sow the seeds evenly and thinly, preferably in rows, so that they may more easily be kept clean. The same directions for covering the seeds should be followed as described above. When the seedlings are about an inch high they should be thinned out, giving each plant plenty of room to grow.

General Collection of Flower Seeds.

FLOWER SEEDS ARE DELIVERED FREE
TO ALL PARTS OF THE COUNTRY.

Ageratum. One of our best bedding plants on account of their ease of culture and free blooming quality, easily raised from seed, not particular as to soil, and covered with a sheet of bloom from early summer until frost. Mixed colors, white and blue. Per pkt. 5 cts.

Alyssum. (Sweet Alyssum). Free blooming dwarf plants for beds, baskets, vases and edgings. Pure white. Pkt. 5 cts.

Amaranthus. Tri-color. A very effective annual plant with beautiful variegated red, yellow and green foliage. A splendid plant for centers of beds or background of borders. Pkt. 5 cts. Oz. 35 cts.

Amaranthus Caudatis. (Love-lies-bleeding). A striking variety with long, dark red, drooping flower spikes. Pkt. 5 cts. Oz. 25 cts.

Antirrhinum. (Snapdragon). A very showy and useful garden plant of the easiest culture, with curious shaped flowers, of the most brilliant and varied colors. Pkt. 5 cts.

Aquilegia. (Columbine). One of our best hardy perennial plants, growing from 1 to 3 feet high and producing their beautiful flowers in abundance in May and June. The colors range from white to purple, rose yellow, striped, etc. Mixed colors. Per pkt. 5 cts.

Arctotis Grandis. A remarkably handsome new annual from South Africa, growing to perfection in our climate and forming well branched bushes two to three feet in height. The single flowers on long stems stand quite loose, above the whitish green foliage, and measure, when fully open, from three to three and a half inches in diameter. The ray florets are white on the upper surface and embellished with a narrow, yellow zone at their base, reverse of petals pale lavender; of very easy culture and flowers continually until heavy frosts. Pkt. 10 cts.

LAWRANCE'S PREMIER ASTERS.

Premier Aster.

markets. A strong healthy grower, producing its large double flowers which show no yellow center, on long stiff stems.

Pure White. Per pkt. 10 cts.

Shell Pink. Per pkt. 10 cts.

Lavender. Per pkt. 10 cts.

One packet of the three colors for 25 cts.

"Daybreak." This new variety has proven itself worthy of the wide popularity it has everywhere met with. The flowers are large, perfectly double and of that soft, delicate, shell pink color so much admired in the Daybreak Carnation. An early and continuous bloomer, and excellent for cutting purposes. Pkt. 10 cts.

"Purity." An excellent variety and identical with the above, except in color, which is a pure, glistening white. Pkt. 10 cts.

Large Flowering Dwarf Queen. Dwarf, bushy plants, growing about 16 inches high, forming a dense bush completely covered with extra large, pure white, perfectly double flowers. Pkt. 10 cts.

Giant Comet. One of the finest of the tall growing Asters, bearing in abundance, the large double flowers, made up of loose wavy and twisted petals.

Pure White, Crimson, Blue, Pink and Mixed. 10 cts. per pkt.

Collection of five varieties for 35 cts.

It is unnecessary to dwell on the beauty of this most popular annual, as they are well known and appreciated by every one. Our seed is the best it is possible to procure from growers who have made a like study of the best means of growing and selecting the best strains.

Lawrance's Premier Mixture. This is a mixture composed of the finest and most distinct colors, selected from the Comet, Perfection, Victoria, Ostrich Plume and many other varieties, giving a mixture that will produce an endless variety of colors and forms, all of vigorous growth and habit. Per pkt. 10 cts.

We have also the mixture of varieties in separate colors, white, pink, purple, crimson and rose. Per pkt. 10 cts.

One packet each of the five separate colors and one mixed for only 40 cts.

Carlson's Improved. A very fine strain of large flowering asters grown almost exclusively as a cut flower variety for the Chicago flower

New Late Blooming Branching. An Aster of exceptional value on account of its late blooming, coming in when the other Asters are through blooming and other annuals have gone, making it valuable for cutting for bouquets and decorations. The plants are of robust growth, growing from 20 to 30 inches high, of branching habit, and produce an abundance of large, well formed flowers, 4 to 6 inches across, resembling chrysanthemums.

White Branching. Pkt. 10 cts.

Pink Branching. Pkt. 10 cts.

Crimson Branching. Pkt. 10 cts.

Purple Branching. Pkt. 10 cts.

Mixed Branching. Pkt. 10 cts.

One packet each of the Branching varieties for 35 cts.

Balsam.

Balsam. An old garden favorite of the easiest culture covered all summer with a profusion of brilliant colored double, rose-shaped flowers.

Finest mixed, pkt. 5 cts.

Pure white, 5 cts.

Brachycome. (Swan River Daisy). A pretty free blooming, small growing annual suitable for small beds, edging, etc. Very free blooming, covered all through the summer with an abundance of blue and white daisy like flowers. Per pkt. 5 cts.

Calendula. (Pot Marigold). Showy free flowering annuals, with yellow flowers produced in great abundance. Pkt. 5 cts.

Calliopsis. Beautiful free blooming hardy annuals of bright colors. Pkt. 5 cts.

Campanula. (Bellflower). Well known, easily grown biennials and perennials producing large bell shaped flowers in great profusion and of many shades of blue and rose, and pure white. Mixed colors, per pkt. 5 cts.

Canary Bird Vine. A rapid growing vine, producing quaint little canary colored blossoms bearing a resemblance to a bird with its wings partly expanded. Per pkt. 5 cts.

Candytuft. Dwarf old-fashioned plants that require no care and will grow in any soil, and are completely covered with blossoms.

Giant Empress. Pure white, pkt. 5 cts.; per oz. 15 cts.

Calliopsis.

Canna. (Indian Spot). One of the finest of bedding plants for this climate. Rich tropical foliage and large spikes of flowers of different shades and colorings. The seed should be soaked in warm water 12 hours before sowing.

Mixed colors, per pkt. 10 cts.

Carnation. (Marguerite). A decidedly popular variety of this beautiful plant on account of its early blooming habit. The flowers are of large size, deliciously fragrant and perfectly double. Seed sown in the spring will produce plants that will bloom continually from August until heavy frosts. Mixed varieties. Pkt. 10 cts.

Cockscomb. ("Glasgow Prize"). A graceful plant, producing large, dark crimson, comb-shaped flowers. Pkt. 10 cts.

Cockscomb. (Feathered Varieties). Fine plants for large beds or groups, producing freely, large feathery plumes, ranging from clear yellow to the darkest red. Per pkt. 10 cts.

Chrysanthemum. Annual varieties. Showy garden plants of great value for cut flowers. Mixed colors. Pkt. 5 cts.

Centaurea Cyanus. (Bachelor's Button). Also called Blue Bottle and Ragged Sailor. Free blooming, hardy annuals; very popular. Mixed colors. Pkt. 5 cts.

Centaurea Imperialis. (Giant Sweet Sultans). A distinct and much improved form of this popular and old garden annual, of the easiest culture and blooming continually all through the season. The plants are of vigorous growth, two to three feet high, and produce abundantly large flowers on long stems, in shades of color ranging from white through all the shades of lilac and pink, to purple, while some are beautifully shaded. The flowers are quite fragrant and when cut last a long time in good condition. The seed should be sown in the open ground early in the spring. Per pkt. 10 cts. 3 pkts. for 25 cts.

Cosmos. Handsome autumn-blooming plant with beautiful foliage. The flowers resemble single dahlias, and are borne in loose, graceful clusters. Plants grow to a height

Cockscomb. (Feathered Varieties.)

of 5 or 6 feet. Seed should be sown in the house in March or April, and transplanted in open ground in May. Mixed colors. Pkt. 10 cts.

Coclea. A rapid growing vine of great value, as a covering for trellises, arbors, trunks of trees, etc. Its large bell shaped flowers are produced late in the season. In sowing the seeds must be planted on edge, and covered firmly with fine soil. Per pkt 15 cts.

Fancy Coleus.

Coleus. Novel and interesting foliage plants easily grown from seed. Our strain produces a great variety of highly colored and attractive plants suitable either for garden or house culture. Per pkt. 15 cts.

Cyclamen. One of the finest pot plants grown, for winter and spring blooming. The plants have beautiful foliage and dainty flowers, freely produced on stout stalks which hold them well above the foliage. The seed may be sown any time in spring or autumn. Pkt. 25 cts.

Dianthus. (Dladem Pink). A most desirable plant of easy culture, and unrivalled for freedom of bloom and variety of rich colors. Valuable for cut flowers and should be in every garden. Double or single mixed. Pkt. 5 cts.

Dahlias. These grand old garden favorites which are now enjoying such a wide popularity are among the easiest flowers to grow from seed. The double varieties blooming the first season if the seed is sown before April, while the single varieties will bloom if the seed is sown in the open ground, although the earlier they are started the longer the season of bloom.

Double mixed. Per pkt. 10 cts.

Single mixed. Per pkt. 10 cts.

Double English Daisy. An old fashioned hardy garden plant, blooming from early spring until well in the summer. The seed should be sown early or if sown in August and transplanted to permanent position in September they will give best satisfaction. Per pkt. 10 cts.

Double English Daisy.

Digitals. (Foxglove.) Large stately ornamental plants, with flower stems 3 to 5 feet high. They succeed under almost any condition and are used to good advantage among shrubbery and in half shady situations. As they are perennial, the seed should be sown in July and transplanted into permanent position in September. Mixed colors. Per pkt. 5 cts.

Eschscholtzia. California Poppy. Very attractive annuals of low growth, and finely divided foliage blooming freely from June until frost. Mixed colors. Per pkt. 5 ts.

Forget-Me-Not. Charming little plants with small star-like flowers of a delicate shade of blue. The plants prefer a moist situation. Per pkt. 5 cts.

Gaillardia. Fine bedding plants, valuable for cut flowers. The flowers are very double, of various and pleasing colors, and freely produced on long stems. Pkt. 5 ets.

Gourds. Very rapid growing climbers, with generally large foliage and odd shaped fruits.

Nest Egg. Fruit white; size of hens egg. Per pkt. 5 cts.

Mock Orange. Per pkt. 5 cts.

All varieties mixed, per pkt. 5 cts.

Heliotrope. A splendid bedding plant of robust growth and easily raised from seed. Its delightful perfume makes it one of the most popular flowers for cutting.
Per pkt. 10 cts.

Hollyhock. A noble, hardy old plant, which should be in every garden. Too well known to need description. Our seed has been saved from the finest and most double varieties. We have them in separate colors—white, rose, pink, crimson, yellow and mixed.
Pkt. 10 cts.

Larkspur. A well known hardy annual which has been greatly improved by careful selection and cultivation. Mixed colors.
Pkt. 10 cts.

Linum. (Flax). Very pretty and effective bedding plants, with fine foliage and brilliant scarlet crimson flowers freely produced.
Per pkt. 5 cts.

Marvel of Peru. (Four O'clocks). A well known old fashioned garden annual, very free blooming and succeeding in any situation.
Fine mixed colors. Per pkt. 5 cts.

Marigold. A showy free blooming plant, of free culture and various colored double flowers.

Double African. Tall. Pkt. 5 cts.

Double French. Dwarf. Pkt. 5 cts.

Mignonette.

Mignonette. (Mammoth Flowering). The largest and finest of this most popular annual. The large individual florets are borne in dense spikes, on long, strong stems, and are delightfully fragrant. Pkt. 10 cts.

Large Flowering Variety. The common sweet Mignonette. Pkt 5 cts.

Morning Glory. The popular and pretty old fashioned climber of many colors. Pkt. 5 cts.

Imperial Japanese Morning Glory. It is almost impossible to accurately describe the colors of this giant variety. There are all the shades of red from flesh pink to the darkest crimson, through all the shades of blue to the deepest purple. Others, pure white, smoky grey, brown and many combinations of these colors. The flowers are enormous, some of them as large as saucers. The edges are frequently frilled, ruffled and scalloped in many curious and beautiful ways. To obtain the best results they should be planted in rather poor soil.
Pkt. 10 cts.

White Star (Parrot-monet). Charming little plants with small star like flowers. The plants prefer a moist situation.
Per pkt. 5 cts.

LAWRANCE'S FINE NASTURTIUMS.

Nasturtium.

blooming. Thrives best in rather poor soil. Pkt. 5 cts.

Our strain of this popular annual is composed of the finest new large flowered varieties: in proper proportions of colors, embracing all the shades of red, yellow, chocolate, rose, etc., as well as striped and blotched and many fanciful combinations of color. In size they are very large and usually borne on long stems.

Tall or Climbing. Beautiful and strong growing annual climbers for trellises, verandas, etc. The plants are covered the entire season with their gorgeous flowers.

Pkt. 5 cts.

Dwarf. One of the best of our garden plants for bedding, massing etc., of compact habit, and very free

PANSIES.

Giant Exhibition. The flowers of this strain are of immense size, and of perfect form and contain a wide range of handsome and striking colors, including the rare and delicate rose and pink shadings, the rich bronze and copper colors, deep shining black, brilliant reds, purples, yellows and many combinations and shadings of these colors. Pkt. 15 cts. Two pkts. 25 cts.

Large Flowering Mixed. A fine strain of large sized, and perfectly formed flowers, embracing many colors and shades. Pkt. 10 cts.

PANSY—Giant Exhibition.

- Common Mixed.** A mixture of all good colors and large size, better than many mixtures sold at twice the price. Pkt. 5 cts.
- Petunia.** Few plants equal this for garden decoration. They are early and very free blooming and continue a mass of bloom all through the season. They are of the easiest culture and do well in any good soil.
- Very Fine Mixed.** A beautiful strain of large size and brilliant colors and markings. Pkt. 10 cts.
- Ruffled Giants.** A comparatively new race from California, the result of the most careful and expert selection and hybridizing. The flowers are of enormous size, many of them five inches in diameter, with deep throat, and edges deeply fluted and fringed, giving them a ruffled appearance. The colors are rich and varied, ranging from pure white to the deepest violet. A splendid variety for bedding. Pkt. 15 cts.
- Phlox Drummondii.** One of our best annuals. There is no plant which can compare with it in brilliancy of color, freedom of growth and duration of bloom, making it of exceptional value for bedding or massing. We have a very fine strain in separate colors, white, crimson or mixed. 5 cts. per pkt.
- Phlox Drummondii Dwarf.** The plants are dwarf and grow very compact, making it very valuable for edging borders, etc.
Fire Ball. Brilliant scarlet.
Snowball. Pure white.
 Extra fine mixed. Pkt. 10 cts. 3 pkts. for 25 cts.
- Portulaca.** Small trailing plants, succeeding in any situation; splendid for edging. Their brilliant and various colored blossoms are produced in great profusion throughout the season. Finest Mixed Double, pkt. 10 cts.; finest Mixed Single, pkt. 5 cts.

POPPIES.

A very popular plant, which has been greatly improved in recent years. There is no plant which produces a more brilliant display of color in its season.

- Snowball.** Pure white, finely fringed. Pkt. 5 cts.
- Paeony-flowered.** Handsome, large, double, globular flowers of the finest colors. Pkt. 5 cts.
- Shirley.** Single and semi-double flowers, of the most delicate shades of pink, rose carmine and crimson. Pkt. 5 cts.
- Iceland.** One of the most useful and beautiful hardy plants in cultivation. They are perfectly hardy without any protection, and bloom the first season from seed. They commence blooming early in spring and continue all through the season. We have them in separate colors—white, orange-scarlet, yellow and mixed. Pkt. 10 cts.
- Primrose.** (*Primula Chinensis*). This is without question the best pot plant for house culture during the winter months, succeeds best in a cool room without direct sunlight, a north window being an ideal place. The seed should be sown from March to May. Our strain is unsurpassed, being the product of the best European growers. We have them in white, rose, red and mixed. Per pkt. 25 cts.
- Ricinus.** (Castor Oil Bean). Highly ornamental plants of stately growth and handsome foliage, attaining a height of from 6 to 10 feet. Mixed varieties. Pkt. 5 cts.

Salpiglossis. A beautiful and free blooming plant with handsome veined and tinted funnel-shaped flowers.
Pkt. 5 cts.

Salpiglossis.

Salvia. (Flowering Sage). A very bright and showy bedding plant of rather strong growth, bearing long spikes of brilliant scarlet flowers in great profusion in late summer and fall. The seed should be sown in the house or hotbed as early as possible and the young plants planted out when the weather becomes settled and warm.
Pkt. 10 cts.

Schizanthus. (Butterfly Flower). A charming annual which on account of its ease of culture and the remarkable coloring of its flowers has been called the "Poor Man's Orchid." The plants attain a height of about 15 inches, branching freely and producing a multitude of large panicles of lovely blossoms. Per pkt. 10 cts.

Scabiosa. (Mourning Bride). One of the prettiest of our annual plants, producing an abundance of richly colored flowers on long stems. A fine flower for bouquets, etc. Pkt. 5 cts.

Scarlet Runner Beans. A beautiful old ornamental climber of rapid growth, producing bright scarlet pea-shaped blossoms in abundance. Grows 11 to 15 feet high. Pkt. 5 cts. Pint 25 cts.

Sensitive Plant. (Mimosa Pudica). Very interesting and curious plants, the leaves of which droop and close when touched. Pkt. 5 cts.

Stocks, Large Flowering Ten-weeks. An exceedingly popular and beautiful old garden favorite of many colors and delightful fragrance. Fine for cutting. Pkt. 10 cts.

Stock Princess Alice. (Cut and come again). A fine, pure white, perpetual blooming variety of great value for cutting. If sown early it will bloom continuously from June until heavy frosts. Pkt. 10 cts.

Sweet William. An attractive, free blooming, old fashioned plant of rich and varied colors, perfectly hardy. Pkt. 5 cts.

LAWRANCE'S SELECT LIST of SWEET PEAS

ABSOLUTELY THE CREAM OF 150 VARIETIES.

We do not list an extended variety, but only the best and most distinct, as there are so many varieties so nearly alike that only an expert can distinguish them. We grow the new varieties side by side with the old ones, carefully comparing them, and discard all inferior varieties and those not really distinct or improvements on old varieties. This enables us to list a collection of varieties which cannot be improved upon.

Countess Cadogan. Very large flowers of a bright blue color. Very attractive.

Countess of Lathom. Delicate rosy pink, tinged chamois.

Countess of Radnor. Delicate lavender, very fine.

Dorothy Eckford. The finest pure white variety yet introduced. The flowers are of extra large size, beautifully shell shaped and generally borne three on a stem.

Dainty. Rightly named on account of the dainty coloring, white with pink edge.

Emily Henderson. Pure white, early and profuse. Very popular. Pkt. of 1 oz. 5 cts. each.

Aurora. Very large flowers, standards and wings white, striped and flaked with bright Orange Salmon.

Blanche Ferry. Pink and white. The most popular variety in cultivation. Per pkts. of 1 oz. 5 cts. each.

Black Knight.

The best dark variety, rich deep Maroon.

Earliest of All.

Identical in color with Blanche Ferry, but blooms two weeks earlier.

Hon. Mrs. E. Kenyon. A giant flower of a beautiful primrose color. An improved Mrs. Eckford.

King Edward VII. A grand scarlet variety with very large flowers on long stems.

Lovely. Extra large flowers of a beautiful bluish pink shade.

Lady Marie Currie. Bright orange pink, a novel and striking color.

Miss Willmott. Rich orange pink, delicately shaded rose. Has no superior in color.

Mrs. Dugdale. One of the largest flowers of all. Beautiful carmine rose, with faint markings of primrose.

Mrs. Walter Wright. A very fine variety of the now popular mauve color.

Navy Blue. A true blue color, very distinct.

Sadie Burpee. A grand new pure white, of splendid substance and very fine for cutting.

Salopian. One of the largest, flowers deep scarlet, very brilliant.

Lawrance's Fine Mixed. A splendid mixture embracing all the above large flowering varieties, and many other bright and pleasing shades and colors in good proportions. This mixture is not to be compared with many which contain 50 to 75 per cent, of blue and purple shades, but may be absolutely depended upon to produce a rich and varied collection of colors in proper proportion. Ounce pkts. 5 cts. Lb. 60 cts.

Price. Any of the above varieties 5 cts. per pkt., 10 cts. per doz., 25 cts. per $\frac{1}{4}$ lb.

Complete Collection of the above 20 varieties and one ounce packet of **LAWRANCE'S FINE MIXED** for 75 cts.

CUPID, or BEDDING SWEET PEAS.

Cupid. A new dwarf or bedding variety, suitable for edgings or borders or for pot culture. They are true dwarfs with no tendency to climb whatever. Very free blooming. Large, pure white, fragrant flowers. Pkt. 5 cts. Oz. 15 cts.

SWEET PEA—Cupid.

Pink Cupid. Identical with preceding, except in color, which is pink and white, and like the well-known variety, *Blauche Ferry*. Pkt. 5 cts. Oz. 15 cts.

Mixed Cupids. A mixture containing all of the colors and shadings of the tall varieties. Pkt. 5 cts. Oz. 10 cts.

Zinnia

Verbena. An indispensable bedding plant of spreading habit, and very free blooming. Our seed has been saved from the finest large flowers of brilliant colors and shades. Pkt. 10 cts.

Zinnia. Hardy, showy annuals, free blooming, and will thrive in any soil. The flowers of our mixture rival the dahlia in size and form. Pkt. 5 cts.

General Collection of Plants.

ABUTILON—Souvenir de Bonn.

orange color, veined with crimson. We have numerous other varieties—white, yellow, red, etc.

AGERATUMS.

Dwarf, ever-blooming plants, excellent for borders, carpet bedding, etc. 10 cts. each. \$1 per doz.

Blanche. Pure white.

Princess Pauline. A very pretty new variety with pure white flowers, bordered with a ring of sky blue, giving it a very pretty appearance.

Stella Gurney. The best variety grown, 6 to 8 inches high, compact and bushy; a mass of deep blue color.

ALTERNANTHERA.

Beautiful, highly colored foliage plants, growing in dense masses; indispensable for foliage beds, ribbon lines, etc. 50 cts. per doz. \$4 per 100.

Aurea nana. Golden yellow.

Rosea nana. Carmine and rose.

Paronychioides major. Rosy crimson and scarlet.

ABUTILON.

Handsome flowering-shrub, with pendulous bell-shaped flowers, produced in abundance the year round. Makes a fine plant for the window garden.

Strong Plants, 15 to 50 cents each.

Savitzi. A dwarf, compact growing variety, with large deep green foliage, bordered with a deep band of pure white, resembling the silver edged geraniums.

Souvenir de Bonn. A beautiful variegated variety of strong, vigorous growth, forming handsome tree-like specimens. The flowers are

Araucaria Excelsa.

ASPARAGUS—Plumosus nanus.

ARAUCARIA EXCELSA.

Norfolk Island Pine. An elegant and graceful evergreen plant, well adapted to house culture; attractive and graceful in appearance. Fine plants \$1 to \$5 each.

ASPARAGUS.

Plumosus nanus. One of the most distinct and effective decorative plants grown. The leaves are bright green and finer than the most delicate lace work—much handsomer than Maid-eu-Hair fern. Fine plants 15 cts to \$1 each.

Sprengerii. A graceful and pretty new variety useful for hanging baskets or decorative purposes. Its long drooping fronds are rich, glossy green in color and are from 2 to 5 ft. in length, and when cut will retain their freshness for weeks. An excellent plant for the dwelling house as it successfully stands the dry atmosphere. Young plants 15 cts. Strong plants 25 cts. Specimen plants \$1 to \$5.

ASPIDISTRA LURIDA VARIEGATA.

A beautiful decorative plant of the easiest culture; large lance-shaped leaves, finely variegated with creamy white; an excellent house plant. 50 cts to \$1 each.

AZALEA INDICA.

Beautiful plants for window and conservatory decorations, blooming from January till April. Their diversity of color and freedom of bloom will always make them

ASPARAGUS—Sprengerii.

favorites. 75 cts. to \$2.50 each.

BEGONIAS.

Easily grown, free blooming plants, well adapted to house culture. Many of them have highly ornamented foliage, as well as handsome flowers. They are remarkably free from insects and they succeed with everyone.

Strong plants from 2½ inch pots, 15 cts. each.

Larger plants from 25 cts. to \$1 each, according to size.

Begonia Rex.

BEGONIA REX.

This class of Begonia is grown for their remarkable and richly colored foliage, and are well adapted to house culture in shady positions. We have a large collection of the new and old varieties.

Strong young plants, from 2½ inch pots, 15 cts. each.

Large plants, 25 cts. to 50 cts each, according to size.

BEGONIA—Tuberous Rooted Varieties.

These are among the handsomest of our summer flowering bulbs. They commence blooming early in summer, and continue until cut down by frost. They rival geraniums in brilliancy and diversity of color. They should be dug in the fall, and, when thoroughly dried, packed in dry sand or charcoal dust, and stored in a dry room until March or April, when they may be started again. We have them in separate colors; scarlet, crimson, yellow, pink and white. Dry bulbs, 10 cts. each, \$1 per doz. Started in pots, 15 cts. each, \$1.50 per doz.

Double Varieties Mixed.

20 cts. each; \$2 per doz.; started in pots, 25 cts. each; \$2.50 per doz.

Tuberous Rooted Begonias.

BEGONIA FLOWERING VARIETIES.

Argentea guttata. A fine variety with handsome bronze-green leaves, with silver markings; beautiful silvery white flowers.

Glorie de Loraine. The finest Begonia ever introduced, and one that will always give satisfaction. Plants are graceful and pretty, growing 12 to 15 inches high, and are completely covered from October until May with beautiful soft rosy pink flowers, which remain on the plants for weeks without fading. 25 cts. each.

Incarnata grandiflora. A handsome winter blooming variety, with dark green foliage and beautiful pink flowers.

Semperflorens rosea. An elegant variety; of strong, upright growth. Its brilliant cardinal red flowers are borne in large panicles well above the foliage; one of the best.

Véron. A grand new sort for bedding or house culture; flowers freely in the garden. When young the foliage is dark green, turning deep bronze in strong sunlight. The flowers are deep rose when first open, changing to lighter color when fully open.

CARNATIONS.

These being a specialty with us, we annually test all of the new varieties offered, retaining only the best and most distinct, and discarding the varieties which have been improved upon. While there are hundreds of varieties listed at the present time, the following will be found to be absolutely the cream of all varieties.

Strong plants from 2 inch pots, 10 cts. each, \$1 per dozen.

Strong plants from 3 inch pots, 15 cts. each, \$1.50 per dozen.

Large plants, from 5 and 6 inch pots, for immediate flowering, 25 cts. to 50 cts. each, \$3.50 per dozen.

Some of the finest varieties are not adapted to summer blooming, but if the selection of varieties is left to us merely mentioning the colors desired, we can give plants that will be certain to give satisfaction.

Boston Market. Pure white, very free blooming; rich, spicy fragrance.

Enchantress. The most popular of all light pink varieties, large flowers on long stems; the plant is a strong, healthy grower and very free blooming.

- Fair Maid.** A beautiful light pink variety, with large nicely fringed blossoms.
- Flamingo.** An early, free and continuous bloomer of ideal habit. The flowers are brilliant scarlet in color, and average three inches in diameter.
- Harlowarden.** A fine crimson variety with large fragrant blooms on long stems.
- Lady Bountiful.** Pure white, large and fine.
- Mrs. T. W. Lawson.** A grand variety of extraordinary size; flowers three to four inches in diameter, and of the richest deep pink color.
- Prosperity.** One of the largest varieties yet introduced. The color is white mottled in soft pink.
- Robt. Craig.** A fine new scarlet variety, with large fragrant flowers on long stems.
- The Queen.** A free blooming pure white variety.

CHRYSANTHEMUMS.

We have a fine collection of this, the "Queen of Autumn," but on account of the large number of varieties, lack of space forbids us to mention them. We have one house 30 by 70 feet, devoted entirely to them in their season, and as many of the largest and finest varieties as grown for cut flowers are not suited for pot culture, it would be better to leave the selection of varieties to us, mentioning the colors desired, and whether wanted for bush plants in pots, or single stem plants for bench culture in the conservatory.

Strong plants, 10 cts. each, \$1.00 per dozen.

Large blooming plants in the fall, in 5, 6 and 7 inch pots, 35 cts. to \$1 each.

CANNAS.

NEW LARGE FLOWERING.

This is one of the most effective and desirable plants grown, whether for vases planted singly, or in masses, or as a background for other plants. The flowers are large, freely produced and of brilliant and pleasing colors and combinations. Some of them rival Orchids in beauty. The foliage is stately and elegant with a tropical appearance, which together with their handsome blossoms, give a splendid effect.

Although we have grown dozens of varieties, we have selected the following as the best for all purposes.

Price—Strong plants 15 cts. each, \$1.50 per doz., \$10 per hundred.

- Aisace.** Light sulphur yellow, changing to creamy white. Height 4 feet.
- Alphonse Bouvier.** A grand variety of remarkably luxuriant growth, attaining a height of 6 to 7 feet in rich soil. The flowers are rich, brilliant crimson when first open, changing to a deeper shade as they grow older. Foliage dark green.
- Beaute Poitevine.** A grand dwarf crimson variety, succeeding under all conditions.
- Florence Vaughan.** This is one of the finest and most distinct varieties. The flowers are of the largest size and most perfect form; color bright golden yellow, spotted with brilliant scarlet; foliage bright green, growth about 4 feet.
- President McKinley.** One of the earliest blooming varieties and one of the best for bedding or pot culture. The plant is dwarf in habit, growing only 2½ to 3 feet high, even in very rich soil; foliage, rich green, with bronze margin; blossoms are large, in full regular trusses carried well

Cannas.

Madame Crozy. This variety, by reason of its handsome coloring and freedom of bloom, will always be popular. Flowers are of the largest size, of a dazzling crimson-scarlet color, edged or bordered with a distinct golden yellow band. Plant a fine grower, rarely exceeding 4 feet. Foliage fine green.

Mlle. Berat. The nearest approach to a pink among Cannas, not having that bleached out effect of all the so-called pink varieties. The effect is very fine when painted with the yellow and bright red varieties.

Queen Charlotte. A gilt edged variety with large trusses of beautiful bright orange-scarlet flowers, margined with pure golden yellow; foliage broad deep green; height 3 to 4 feet.

Wm. Bofinger. Very large flowers of a rich bright scarlet, shading to orange, a color to be seen as far as the eye will carry.

NEW ORCHID FLOWERING VARIETIES.

A distinct race with enormous flowers and broad massive foliage. The habit of all these varieties are similar, being very free blooming of vigorous growth, and in good soil attain a height of 5 to 6 feet.

Allemania. Extra large flowers frequently measuring six inches across; outer petals salmon scarlet with broad margin of golden yellow; inside petals dark salmon red, dotted and marked with yellow; green foliage.

Burbank. A beautiful variety which originated in California, and the best yellow variety yet introduced. The flowers are of enormous size and of beautiful rich canary yellow color with a few carmine spots in the throat. Larger, freer blooming and better in every respect than the Italian variety, Austria.

La France. Rich bronzy red foliage with a rich lustrous appearance. Plant: a strong grower of compact habit with beautiful flowers of a rich orange-scarlet color.

Mrs. Kate Gray. The strongest growing variety in our collection. Immense trusses of flowers of a rich shade of orange scarlet, overlaid with gold.

Price—Strong plants, 15 cts. \$1.50 per dozen.

The set of four Orchid Flowering Varieties for 50 cts.

CALADIUM ESCULENTUM.

(Elephant's Ear.)

A handsome tropical-looking plant from 5 to 6 feet high, with leaves 2 to 3 feet long and 1 to 2 feet wide; fine for single specimens on the lawn or centers of beds. They should have very rich soil, and plenty of water to obtain the best results. Large bulbs started, 25 to 50 cts. each.

Fancy Coleus.

FANCY LEAVED CALADIUMS.

Very handsome and popular plants for the conservatory or window boxes, or for planting out in partially shaded and protected situations. The foliage is rich and handsome and rivals in color the Rex Begonias. 25 cts. each.

COLEUS, FANCY.

This beautiful family of ornamental foliage plants has been steadily increasing in beauty and diversity of color for a few years past, until now it seems as if there was no degree of shading, blending or contrasting of color that may not be found in them. They are of the easiest culture either in pots or bedded out, and so cheap as

to be within the reach of all. We have a fine collection of the handsomest varieties in cultivation.

Price, 5 cts. each, 60 cts. per doz., \$4.00 per hundred.

COLEUS, BEDDING VARIETIES.

The following varieties are the well known sorts so much used for foliage beds, ribbon lines, etc.

Verschaffelti. Crimson

Mrs. I. D. Haight. Yellow.

Firebrand. Deep crimson; strong grower.

Sheley's Yellow. A strong growing yellow variety.

Price—5 cts. each, 60 cts. per doz. \$4.00 per hundred.

CENTAUREA GYMNOCARPA.

(Dusty Miller.)

Handsome foliage plants with graceful fern-like leaves of a silvery white color. Largely used for borders foliage beds, etc., in connection with Coleus, etc. 5 cts. each, 60 cts. per doz., \$1.00 per hundred.

CENTAUREA CANDIDISSIMA.

A beautiful white leaved foliage plant, with tough leathery leaves holding its silvery appearance all through the season. Fine for borders, vases, etc. 10 cts. each. \$1.00 per dozen.

Cyperus Alternifolius.

CYPERUS ALTERNIFOLUS.

A splendid semi-aquatic plant, the stems and leaves resembling the frame of an umbrella. A fine plant for the center of vase or aquarium. 15 and 25 cts. each. Large plants 50 cts. to \$1.00 each.

CYCLAMEN PERSICUM.

One of the most beautiful and decorative pot plants grown. The foliage is dark green, beautifully variegated with silver and rose colors. Its fragrant blooms are produced in abundance in winter and spring. 25 cts. each; large plants, 50 cts. and 75 cts. each.

DRACENA.

Indivisa. (Fountain Plant). A useful decorative plant, much used for center of vases, baskets, etc. It stands full exposure to the sun and contrasts beautifully with flowering or foliage plants. 25 cts. to \$3.00 each, according to size.

Fragrans. A fine variety with deep green, broad, gracefully drooping leaves. 35 cts. to \$2 each, according to size.

Dracena Indivisa.

CINERARIA HYBRIDA.

Handsome winter blooming plants, with branching heads of showy star-shaped flowers of the richest colors. Price, in Fall, 15 cts. each, \$1.50 per doz.; large plants, in Winter, in bud or bloom, 25 cts. to 50 cts. each.

CALLA LILY.

Ethiopica. The well-known Calla Lily, 25 cts. to \$1.00 each, according to size.

Little Gem. A dwarf form of the above, seldom growing over a foot in height. 25 cts. each.

Spotted Leaved. A variety with deep green leaves, regularly spotted with pure white, giving the plant a very ornamental appearance. 15 cts. and 25 cts. each.

DAHLIAS.

Probably no plant has, in late years, received the attention from specialists that this old garden favorite has. The result of their work has been marvelous, and although some of the old varieties are still grown, the remarkable development attained in purity of color, perfection of form, general excellence and freedom of bloom in some of the new varieties is simply wonderful. Of the many varieties we have grown the past few seasons, the following list has been selected as being the most distinct and best adapted to general garden culture.

Price—Strong plants started in pots 15 cts. each. \$1.50 per doz.

Dahlias.

- A. D. Livoni.** A beautiful, clear pink quilled variety of perfect form. Very free blooming.
- Arabella.** An early and free flowering variety of large size and perfect form; color: pale primrose shaded lavender.

- Catherine Duer.** Very large flowers opening out flat and showing no center; color: a beautiful and glowing red.
- Capstan.** A remarkably free flowering Cactus variety; color: soft orange-scarlet shaded apricot.
- Countess of Lonsdale.** A splendid variety, flowering freely under all conditions; color: a pleasing blending of salmon pink and amber.
- C. W. Bruton.** A fine bright yellow decorative variety.
- Dr. Zacharias.** A Cactus variety of perfect form and very free flowering; color: clear yellow.
- Eloise.** Ground color blush pink shading to white, each petal margined with glowing crimson; a fine variety that will become a great favorite.
- Eleganta.** A superb pompon variety of free blooming qualities bearing lovely flowers of a pleasing shade of pink, petals beautifully quilled.
- Fairy Queen.** Another fine pompon variety with light yellow flowers, edged pink.
- Harry Freeman.** Large pure white flowers, very free blooming.
- Kreimhilde.** An exquisite and delicate shell pink, shading to white at the center. Without question the finest and most perfect pink Cactus variety in cultivation, and as a cut flower is unsurpassed by any.
- Matchless.** A strong and vigorous variety of dwarf compact growth, with large rich velvety maroon flowers.
- Miller's Red.** A grand decorative Dahlia of immense size. The color is a rich crimson-scarlet. A fine variety for cutting, as the flowers are borne on long stems.
- Mirefield Beauty.** A beautiful shade of red, one of the best.
- Nymphaea.** A beautiful variety resembling a delicate pink water lily.
- Oriental.** Large rich salmon-colored flowers of fine form and very double.
- Purity.** A beautiful pure white variety of fine form.
- Pink Dandy.** A pure pink variety of fine form; fine for cut flowers.
- Perle d'Or.** The finest white decorative variety yet introduced.
- Queen of Yellows.** The best large flowering clear yellow, show variety.
- Red Warrior.** Rich crimson flowers of large size; always in bloom.
- Snow Clad.** A perfect gem, with its abundance of little pure white flowers, one of the best pompon varieties.
- Standard Bearer.** Rich fiery scarlet. A very free blooming Cactus variety.
- Strahlen Krone.** The handsomest and most perfect variety. The petals are long and curiously twisted, giving it a very graceful appearance; color: intense cardinal red, rich and glowing.
- Storm King.** An early, continuous and free bloomer, of strong constitution and dwarf branching habit. The flowers are pure white, of regular outline and very double, and are freely produced on long stems, making it a fine variety to grow for cut flowers.
- Wm. Agnew.** The best rich dazzling red of the Cactus variety yet introduced.
- White Bedder.** A fine large pure white variety of exquisite form.
- Volker.** A charming free flowering clear yellow variety of the Cactus type.

One each of the 29 varieties for \$3.00.

NEW CENTURY SINGLE DAHLIAS.

These varieties have all the characteristics of the popular variety, Twentieth Century, except in color.

Twentieth Century.

Twentieth Century. A grand new variety valuable not only as a decorative flowering plant for the garden, but as a choice cut flower. The cut blooms bringing higher prices in the large city markets than roses. The plant is of branching habit, strong growing and produces its flowers on stems two to three feet long. The flowers are rich deep carmine rose fading to white at the ends of petals, with a white band at the disc, and measure four to six inches in diameter.

Crimson Century. A grand variety with deep rich velvety crimson flowers on long stiff stems.

Sunset. Large perfect flowers of a beautiful golden yellow and having a broad band of red around the disc. Price, 15 cts. each. The set of three varieties for 35 cts.

NEW COLLARETTE DAHLIAS.

A distinct type, the peculiarity of which is in the extraordinary development of its flowers, they having a row of short petals around the disc, which are of an entirely different color from the rest of the flower, giving them a very striking appearance. 15 cts. each.

FERNS.

We have a large collection of many different varieties of Ferns, but describe only those most generally known and which are best adapted to house culture.

THE CRESTED SWORD FERN.

Anna Foster. A valuable and promising new variety of the Boston or Sword Fern and entirely distinct from it. The habit of the plant is light and graceful and although pretty in a small state its full beauty is best seen in plants of good size. On the upper half of the fronds the leaflets are divided into smaller leaflets, not overlapping as in the Ostrich-Plum variety, but each leaflet standing out clear and distinct, which gives it that light airy appearance so desirable in any decorative plants.

Strong plants from 5 inch pots, 50 cts. each.

Large plants \$1.00 to \$5.00 each.

Adiantum Cuneatum. (Maiden Hair).
A fine variety and one of the most useful and generally known. 25 cts. to \$1.00 each.

Boston Fern. (*Nephrolepis*.) This variety is of exceptional value for house culture, as it stands the dry atmosphere of ordinary dwellings, and with ordinary care soon makes fine specimens. It differs from the ordinary Sword Fern in having longer fronds which arch and droop over gracefully, making it an excellent plant for the table or pedestal.

Strong plants, 15 cts. and .25 cts. each.

Boston Fern.

Large plants, 50 cts. to \$1.00.
Specimen plants, \$1.00 to \$2.00 each.

Nephrolepis Piersonii.

***Nephrolepis Piersonii*.** A distinct and beautiful form of the Boston or Sword Fern, possessing the same characteristic vigor of growth as the old variety; the fronds grow in a most luxuriant manner, each leaflet being sub-divided, forming miniature fronds. This is well shown in the illustration, which gives a faint idea of their grace and beauty.

Fine plants 25 cts. to \$1.50 each according to size.

***Nephrolepis Elegantissima*.** This is a variation of the preceding variety in which the plummy form of the original is more distinctly developed, the plants are more compact in habit with fronds nearly twice as wide, making it more desirable for many purposes than the older variety.

Strong young plants 50 cts. each.

Holly Fern. (*Cyrtomium Falcatum*). A desirable strong growing variety for house culture with rich glossy green foliage.

15 cts. to 50 cts. each.

***Pteris Tremula*.** A useful variety with large fronds.

Sword Fern. (*Nephrolepis Exaltata*). A strong growing variety, producing quantities of long, rich deep green fronds. 15 cts. to \$1.00 each.

FERN DISHES.

We have at all times pans filled with an assortment of ferns and mosses, which can be used in any Fern Dish. When ordering, please state width and depth of dish. 35 cts. to \$1.50 each, according to size and quality.

FEVERFEW.

(Bridal Rose.)

Little Gem. Large flowers of perfect form and of the purest white.
5 cts. each, 50 cts. per doz.

FUCHSIAS.

These are too well known to need any description. Our collection consists of many varieties of which a few of the best are described below. Plants from 2½ inch pots, 15 cts each, \$1.50 per doz.; 4 inch pots, 25 cts. each, \$2 per doz.

Fuchsia.

- Rosaine's Patria.** The best double white, an early and free blooming variety.
Speciosa. A genuine winter blooming variety, of good habit; flowers large and of good substance; sepals rosy carmine, corolla brilliant carmine.
Le Negre. The best of the dark varieties; carmine tube and sepals; corolla deep purple.
White Beauty. A fine variety with large flowers freely produced. Sepals red, corolla white.

FICUS ELASTICA.

(India Rubber Plant.)

One of the best decorative plants for the dwelling, its thick, leathery leaves enabling it to stand the excessive heat and dryness of the ordinary dwelling. They are rapid growing and quickly increase in value and beauty.

50 cts. to \$1.50 each.

GERANIUMS.

We have a large collection of these popular plants including all the newer varieties of merit. They are the most satisfactory bedding plants grown, while at the same time are equally satisfactory as house plants. The

Geranium.

great advance in form and coloring made in recent years have given us some charming varieties.

Price — Strong plants from 2½ inch pots, 10 cts. each. \$1 per doz.

3 inch pots, 15 cts. each. \$1.50 doz.

4 inch pots, 20 cts. each. \$2 per doz.

Specimen plants for center of vases, etc.

35 cts. to 50 cts. each.

DOUBLE VARIETIES.

Alphonse Riccard

A dwarf, vigorous grower of the Bruant variety, with extra large bright scarlet flowers on long stems. Very free blooming and very fine bedding variety.

Beaute Poitevine. Very large semi-double flowers in immense trusses. Color: a beautiful salmon. A grand bedder of the Bruant type.

Countess Castries. Clear bright pink without a trace of lilac. A strong grower and one of the best for bedding.

Francis Perkins. A grand free blooming, bright pink bedding variety; flowers on long stems well above the foliage.

Heteranthe. One of the best semi-double varieties; color: a bright orange-scarlet.

Jean Viaud. A grand pink bedding variety that will rank with the best of any color. Dwarf, stocky growth, strong stems, large trusses and a continuous bloomer, the plant being covered throughout the season. The flowers are semi-double and will stand the sun and rain better than any known variety.

John Doyle. The best all-around scarlet bedder of the Bruant type; color of the richest scarlet very bright and effective; foliage very heavy and stands the sun better than any other variety.

- La Favorit.** A compact growing and very free blooming variety of the purest white. The best double white bedder.
- Marquis de Castelaïne.** A shapely dwarf grower, with large trusses composed of florets two inches and over in diameter. Produces a wealth of bloom the entire season. Color: deep rosy scarlet, shading into pure scarlet at the edge of upper petals. One of the best red varieties ever introduced.
- Md. T. Noizet.** A grand variety of an entirely new color, old rose, shading to orange at the center; very free blooming and a good bedder.
- Md. Jaulin.** A semi-double Bruant variety; delicate peach pink with a wide border of pure white; florets very large in immense trusses. A good bedder and very free blooming. One of the best of recent introduction.
- Richalieu.** Large trusses, formed of very large semi-double florets. Color: crimson scarlet, with shadings of firey scarlet. One of our best bedding varieties.
- S. A. Nutt.** The finest deep crimson bedding variety.

SINGLE VARIETIES.

- Comtesse de Elbe.** Large flowers on long stems. Color: beautiful shell pink, passing to vivid rose.
- Columbia.** A fine bedding variety of dazzling brightness. The upper petals are white, shading to scarlet on the edges; lower petals bright scarlet. Does not bleach out in sunshine.
- James Kelway.** A very pretty variety, with large crimson scarlet flowers of a satiny texture. Useful for pot culture or bedding.
- L'Aube.** A clean vigorous growing variety, with pure white flowers in large trusses.
- Leon Perault.** A free flowering and compact growing variety, with rich deep scarlet flowers in immense trusses.
- Mr. Bruant.** The most distinct and wonderfully colored variety ever sent out. The arrangement of color is unique, white veined, with carmine lake and regularly bordered with bright solferino, often intermingled and producing a striped effect. The plant is a strong vigorous grower and very free blooming.
- M. Du Luc.** Very large flowers in immense trusses; color, clear soft pink, with distinct white eye. A strong grower with heavy foliage.
- Mrs. J. M. Gaar.** The freest blooming single white bedding variety.
- Wurtumburg.** One of the best single bedding varieties grown. Flowers, clear orange-scarlet in immense trusses. A free blooming variety of good habit.

IVY GERANIUMS.

A distinct and splendid class of Geraniums of trailing habit well adapted for baskets, vases or anywhere a trailing plant can be used. 15 cts. each, \$1.50 per doz.

VARIEGATED GERANIUMS.

- Bronze.** Leaves golden yellow, with a handsome bronze zone.
- Happy Thought.** Center of leaves creamy yellow, bordered with rich green. Flowers are deep rose.
- Md. Salleroi.** A compact growing, silver edged variety, for bordering, massing, etc., and rarely exceeding six inches in height; leaves small clear green in color, edged with pure white. 10 cts. each, \$1.00 per dozen. \$6.00 per 100.

Mrs. Parker. Double flowering. A strong growing silver edged variety with beautiful trusses of exquisite rosy pink flowers. The foliage is deep green, broadly margined with silvery white. A good bedder.

Wm. Lannguth. Identical with the preceding except in color, which is a bright dazzling scarlet.

Mrs. Pollock. A fine golden tri-colored variety, bronzy scarlet zone, golden edge.

Freak of Nature. Pure white blotch in center of leaf, with a broad band of green on the margin. Flowers, scarlet.

Strong plants, from 2 inch pots, 15 cts. each, \$1.50 per dozen.

Strong plants, from 3 inch pots, 25 cts. each, \$2.50 per dozen.

SCENTED GERANIUMS.

Rose, Nutmeg Balm, Lemon and Pennyroyal scented varieties.

Strong plants from 2½ inch pots, 10 cts. each, \$1.00 per dozen.

Strong plants from 4 inch pots, 20 cts. each, \$2.00 per dozen.

Gloxinia.

GLOXINIA.

Handsome summer blooming bulbs, with rich, luxuriant foliage, and remarkably rich, trumpet shaped flowers, of the most chaste and elegant colors.

Dry bulbs, 15 cts. each, \$1.50 per dozen.

Started in pots, 25 cts. to 50 cts. each.

HELIOTROPES.

An old favorite of easy culture, doing equally well as bedding plants in the garden or as window plants for the house. They are delightfully fragrant and should be in every garden.

Strong plants from 2½ inch pots, 10 cts. each. \$1.00 per dozen.

Strong plants from 3 inch pots, 15 cents each. \$1.50 per dozen.

Strong plants from 4 inch pots, 25 cts. each. \$2.00 per dozen.

HYDRANGEAS.

An old favorite, producing large heads of flowers, lasting a long time.

Otaksa. This is the variety so extensively used for Easter decorations. It produces very large heads of pink flowers.

Rosea. Similar to above, except in color, which is a deep rose.
25 cts. to \$1.00 each, according to size.

IMPATIENS SULTANI.

A perpetual blooming plant of compact habit. The flowers are a brilliant rose color, and freely produced, whether in the garden or the house.
15 cts. to 50 cts. each.

JERUSALEM CHERRY.

An old-fashioned plant, but one of the most ornamental. It is very popular at the Christmas season, being covered with bright red cherry shaped fruits, which remain on the plant all through the winter. 15 cts. each.

Large plants in fall and winter, with fruit, 25 cts. to \$1.00 each.

LEMON VERBENA.

A useful plant with highly scented foliage. The branches are very useful for bouquets, etc. Small plants, 15 cts. each; large plants, 25 cts. each.

LYCOPODIUM, or SELAGINELLA.

(Club Moss.)

A useful class of low-growing plants, suitable for Wardian cases, ferneries, etc. 15 cts. each.

MIGNONETTE—Mammoth Flowering.

On account of the difficulty in transplanting this popular annual, we grow them in pots so they may be planted without any check whatever. Nicely started in pots, 5 cts. each, 50 cts. per dozen.

MOON FLOWERS.

Ipomea Grandiflora. A climbing plant of rapid growth, blooming abundantly from July till frost. If planted in rich soil, in full sunlight, they attain a length of 20 to 40 feet. The flowers are pure white, 4 to 5 inches in diameter, and begin to open about sundown, and remain open until about noon the following day.

Ipomea Laril. A splendid companion to the above. The flowers are intense violet blue, with redish purple rays. A strong grower and equally as free in bloom. Strong plants in pots 15c. each, \$1.50 per doz. One each of the two varieties for 25 cts.

PANSY—Giant Exhibition.

OTAHEITE ORANGE.

A beautiful and ornamental plant for pot culture; of dwarf bushy habit; blooms and fruits freely in the house. The flowers are deliciously fragrant, and the fruit is edible. Fine plants in fruit or bloom, 50 cts. to \$2 each.

PANSIES—Giant Exhibition.

We have a fine strain of this popular plant grown from selected seed of the finest large flowered and richest colored Pansies, which for size, coloring and form cannot be excelled. Strong plants from pots 5 cts. each, 60 cts. doz. Transplanted from seed bed, 35 cts. dozen.

PALMS.

These stately plants are now becoming indispensable for decorative purposes, for house or conservatory. Most of them are of easy culture, and increase in beauty from year to year.

Areca Lutescens. One of the most beautiful Palms in cultivation. Its bright glossy green leaves are gracefully curved on slender stems, and the entire foliage is gracefully disposed. The stems are golden yellow.

Cocos.

Nice young plants from 3 inch pots, 10 to 12 inches high, 25 cts. each.

Large plants, 50 cts. to \$3.00 each, according to size.

Cocos Weddeliana. A graceful and elegant small Palm with gracefully arching leaves, made up of long, narrow segments of a rich green color. An excellent Palm for fern dishes, etc., being of slow growth, and lasting in perfection a long time.

Nice young plants from 2½ inch pots, 4 to 5 inches high, 25 cts. each. Larger plants 50 cts. each.

Cycas Revoluta. (Sago Palm). One of the most noble and majestic Palms in cultivation. A valuable decorative plant for balcony or house. Their heavy glossy green leaves render them capable of resisting gas, dust and cold drafts, etc., to which decorative plants are exposed.

Beautiful specimen plants \$3 to \$10 each.

Kentia Belmoreana. These are among the best of Palms for general cultivation, being free from disease of any kind, graceful in habit, with bright green foliage. As a decorative plant for the window, table or conservatory, it has few equals.

Kentia Belmoreana.

Latania Borbonica.

Kentia Forsteriana. Very similar to Belmoreana, and having all its good qualities.

Nice young plants of either of the above Kentias, 6 to 8 inches high, 25 cts. each.

Large plants 50 cts. to \$5.00 each, according to size.

Latania Borbonica. The most desirable Palm for general cultivation, with beautiful divided fan-shaped leaves. Nice young plants 4 to 5 leaves 6 to 8 inches high, 25 cts. each.

Large plants, 50 cts. to \$5.00 each.

Phoenix Rupicola. One of the most graceful Palms, with beautiful wide-spread arching leaves, with long narrow pinnae. A useful decorative plant for any situation. \$1.00 to \$3.00.

Washingtonia Filifera. A beautiful Palm with elegant dark green fan-shaped leaves from which hang thread like filaments.

25 cts. to \$1 each.

Phoenix Rupicola.

PANDANUS UTILIS.

(Screw Pine.)

A handsome decorative plant, with long green leaves edged with short red spines. The leaves are thrown out spirally around the stem, hence the name Screw Pine. A grand house plant.

Pandanus Utilis.

50 cts. to \$3.00 each.

PHILODENDRON PERTUSUM.

A handsome decorative plant, with large, glossy green leaves with peculiar openings, cut in a curious manner at irregular intervals. Of the easiest culture in the window or conservatory, and one that always attracts attention from its roots which are as thick as a lead pencil, and are sent down from the trunk to the ground.

50 cts. to \$1.50 each.

THE BABY PRIMROSE.

Primula Forbesii.

The freest blooming of all Primroses and one of the best for pot culture, even the smallest plants throwing up their multitude of beautiful miniature flowers. Color: charming rosy lilac, with yellow eye. The plants are vigorous growers and thrive in almost any situation. 15 cts. each. Larger plants 25 cts. each.

CHINESE PRIMROSE.

There is no plant more useful for winter blooming than the Chinese Primrose. They are of easy culture and thrive and bloom in any situation. We have them in different colors, white, pink, red, etc. 10 cts. to 25 cts. each.

PRIMULA OBCONICA.

A free blooming Primrose, bearing heads of ten to fifteen flowers on long stems well above the foliage; flowers are pure white, shading to lilac. A fine house plant, and always in bloom. 15 cts. and 25 cts. each.

PETUNIA—Double Fringed.

PETUNIA.

Double Fringed. Few plants equal these for bedding or house culture. They commence blooming early and continue all through the season. We have them in pure white, pink, purple, variegated, etc.

Price—Strong plants from 2 inch pots, 10 cts. each, \$1.00 per dozen, larger plants from 3 inch pots, 15 cts. each, \$1.50 per dozen.

Single Fringed. Strong plants from pots 50 cts. per dozen.

Transplanted from boxes, 35 cts. per dozen.

Giants of California. From pots, 75 cts. per dozen.

Transplanted, 50 cts. per dozen.

PELARGONIUMS.

(Lady Washington, or Pansy Geraniums.)

This is one of the most beautiful plants for pot culture or for planting out in the garden. They produce large trusses of flowers of the most exquisite shades and colorings. We have a long list of varieties, but enumerate only a few of the best.

Pelargoniums.

Champion. White, delicately shaded blush, small carmine blotch on lower petals; upper feathered maroon and red.

Countess. Immense flowers of a clear attractive shade of salmon. Large, pure white center, and narrow distinct white edge, feathered maroon on upper petals.

Mabel or Victor. Bright cherry red shading to white at the throat, upper petals heavily blotched with dark maroon.

Mme. Thibaut. White, richly marbled and blotched with rose, the upper petals marked with crimson maroon. Large white center, flowers very large with crimped petals, giving it the appearance of being double.

Mrs. R. Sandiford. An exact counterpart of Mme. Thibaut, except in color, which is pure white.

Price—Strong plants from 2½ inch pots, 15 cts. each, \$1.50 per dozen.

Strong plants from 4 inch pots, 25 cents each, \$2.00 per dozen.

Larger plants, 25 cts. to \$1.00 each.

ROSES.

TEA AND EVERBLOOMING VARIETIES.

We have one house 100 feet long devoted entirely to Roses and grow only such varieties as will succeed under ordinary conditions. While there are hundreds of varieties, we believe that those that are most satisfactory with us will also prove satisfactory to our customers.

Strong plants from 2½ inch pots, 15 cts. each, \$1.50 per dozen.
From 4 inch pots, 25 cts. each, \$2.50 per dozen.

Bon Silene. Valuable alike for winter or summer blooming; color: rosy carmine; exquisite tea scent.

Bridesmaid. The most popular of all Tea Roses, more flowers being sold of this variety than any other. The color is a rich deep pink.

Cothilde Soupert. A compact, vigorous growing variety, and very free flowering, even the smallest plants being covered with buds and flowers. Its form and substance are perfect. The color is a beautiful pearl-white, deepening to rosy blush in the center. A fine plant for pot culture or bedding.

Roses.

Duchesse de Brabant. A valuable free-blooming variety of a silvery pink color. A good bedding variety, and very fragrant.

Gross an Teplitz. A queen among bedding varieties on account of its fine rich color and free blooming qualities, succeeding under ordinary conditions. Its color is rich scarlet shading to deep velvety crimson. The mass of color produced is simply wonderful and the foliage also is beautiful, all the young growth being a bronzy plum color. Very fragrant.

Hermosa. An old favorite with bright rich pink blossoms, very free blooming.

Maman Cochet.

Perle des Jardins. Rich yellow; beautiful large flowers of perfect form. The most popular yellow Rose for winter blooming.

The Bride. A strong growing, free flowering variety, for pot culture or bedding.

Maman Cochet. A very strong growing variety, producing flowers in the greatest profusion; color, deep rose pink, inner side of petals silvery, rose very double.

White Maman Cochet. Identical with the preceding, except in color. An ideal bedding variety.

HARDY AND HYBRID PERPETUAL ROSES

Many of the varieties of Roses offered by firms farther south as "perfectly hardy," are tender in this climate and almost sure to kill to the ground even with the best of protection which all Roses should have in this climate. We enumerate only the varieties which are hardiest and best in this section and among these will be found some of the best that can be grown anywhere. Customers will not be disappointed by leaving their selection of varieties to me merely mentioning the colors desired. Although we have a large stock we occasionally run short of some varieties before the selling season closes; therefore purchasers will please state if they wish us to substitute in case all the varieties ordered cannot be supplied.

- Alfred Columb.** Brilliant carmine-erimson. Very large, full and of fine globular form, very fragrant and an extra fine sort.
- Anna de Diesbach.** Clear, bright carmine; a beautiful shade, very large flowers and one of the hardiest.
- Caroline de Sansal.** Pale flesh color, deepening toward the center; very hardy.
- Clio.** One of the finest Roses in cultivation. Beautiful flesh color of the most delicate texture; very large size and globular in form.
- Fisher Holmes.** Deep glowing erimson, large and of fine form.
- Gen. Jacquiminot.** Brilliant shining crimson. The most popular of all hardy Roses.
- John Hopper.** Brilliant Rose, changing to pink; flowers large, fragrant and freely produced.
- Margaret Dickson.** A lovely shining white variety, with large well shaped flowers. A strong vigorous grower.
- Madam Plantier.** Pure white flowers produced in abundance, early in the season. Small shining green foliage. Very hardy.
- Md. G. Liuzot.** Silvery pink, very fine.
- Mrs. John Laing.** Delicate pink; fragrant and a continuous bloomer.
- Persian Yellow.** Bright yellow flowers, rather small; the best hardy yellow rose.

Prince Camille de Rohan. Deep velvety crimson-maroon shaded red.

Soliel d'or, or Golden Sun. A really hardy golden yellow rose. The result of a cross between the Persian Yellow and a Hybrid Perpetual variety. It retains a good deal of the character of the Persian Yellow but with larger and more plentiful foliage. The flowers are large, full and double and of a coloring difficult to describe, the flowers varying in color from gold and orange to reddish gold, shaded with Nasturtium red.
Price—Strong 2-year-old plants, 50 cts. each, \$4.50 per dozen.

MOSS ROSES.

Strong plants of the following varieties, 50 cts. each, \$4.50 per dozen.

Comtesse de Murinais. One of the best pure white Moss Roses. The buds are finely mossed; flowers large and fragrant.

Crested Moss. Deep pink colored buds, surrounded with a mossy fringe and crest. A fragrant and beautiful Rose.

HARD / CLIMBING ROSE.

Crimson Rambler. This new and distinct climbing variety, about which so much has been said, has fully justified itself in growth and bloom. The plant is a strong, vigorous grower, growing 8 to 10 feet in a single season; the individual flowers are about 2 inches in diameter and are borne in large pyramidal clusters of thirty to forty blossoms; the color is a rich glowing crimson.

Price—Strong 2-year-old plants, 50 cts. each.

RUGOSA ROSES.

Strong plants, 50 cts. each.

An interesting class, of Japanese origin, with large single flowers. The plants are very ornamental on account of their vigorous growth and beautiful glossy green foliage. They bloom nearly the whole summer, and are covered during autumn and winter with bright red seed pods.

Rugosa Alba. Large pure white flowers, of delicious fragrance.

Rugosa Rosea. Large rose-colored flowers, tinged with violet. A stronger growing variety than the preceding.

SALVIA OR SCARLET SAGE.

This grand bedding plant will keep the garden bright with its brilliant scarlet flowers until late in autumn. It is also useful as a pot plant or in window boxes, and as a cut flower is useful to give color.

Price—10 cts. each \$1.00 per dozen.

Larger plants, 15 cts. each, \$1.50 per dozen.

SMILAX.

A graceful climbing plant, with glossy green foliage much used for bouquets, table and room decoration, etc. 15 cts. each.

SOLANUM JASMINOIDES GRANDIFLORA.

An excellent climbing plant but can be trained in bush form; beautiful star-shaped flowers, borne in clusters; pure white with a violet tinge on back of petals and buds. Equally valuable for house culture in winter or for the garden in summer. 15 cts. and 25 cts. each.

SWAINSONA GALEGIFOLA ALBA.

A beautiful everblooming plant, with pure white flowers produced in sprays of 15 to 20 flowers each; the individual flowers resemble sweet peas; the foliage is graceful and luxuriant; of easy cultivation, growing in almost any light situation. 15 cts. to 25 cts. each.

VIOLETS.

Marie Louise. Deep violet blue. Very fragrant double flowers. The finest variety for winter blooming. 15 cts. each, \$1.50 per doz.

Princess of Wales. A strong growing single variety with long stemmed flowers, very fragrant. 15 cts. each \$1.50 per dozen.

WANDERING JEW.

(Tradescantia.)

The well-known creeping plant so useful for baskets, vases, etc., or for house culture. It will grow in water or soil in almost any situation.

Repens. Plain green leaves. 10 cts. per bunch.

Multicolor. A combination of silvery white, pink and bronze green, reverse of leaves, rosy lilac.

10 cts. each, \$1.00 per dozen.

Variegata. Variegated green and white leaves.

10 cts. each, \$1.00 per dozen.

VERBENAS.

(Mammoth Varieties.)

One of the most showy plants for the garden, blooming incessantly all through the season. Our collection embraces all shades and colors known to the verberna.

Plants from pots, 5 cts. each, 60 cts. per dozen.

Transplanted, 35 cts. per dozen.

Verbena.

VINCA MAJOR.

(Variegated.)

One of the finest trailing plants in cultivation for baskets, vases, etc. The leaves are green broadly margined with pure white and yellow as blue.

Small plants, 17 cts. each.

Large plants, with long vines, 25 cts. to 50 cts. each.

ANNUAL PLANTS.

TRANSPLANTED FROM SEED BEDS.

Asters. Comet, Carlson's, Victoria, Mignon, Branching, Purity, Daybreak, etc., in separate colors or mixed 25 cts. per dozen.

Antirrhinum. (Snapdragon). Mixed colors, 25 cts. per dozen.

Alyssum. (Sweet Alyssum). White, 25 cts. per dozen.

Balsam. Double-flowered, mixed colors, 25 cts. per dozen.

Calendula.

Candytuft. White, 25 cts. per doz.
Calendula. (Pot Marigold). Yellow, 25 cts. per dozen.

Castor Oil Plant. (Ricinus). Best varieties, 10 cts. each, \$1 per dozen.

Coxcomb. (Glasgow Prize). Best crimson, 50 cts. per dozen.

Chrysanthemum. (Painted Daisy). Mixed colors, 25 cts. per doz.

Cosmos. Large flowering, mixed colors, 35 cts. per doz.

Dianthus. (Diadem Pink). Single mixed, 25 cts. per dozen. Double mixed, 25 cts. per doz.

Gaillardia. Double, mixed colors, 25 cts. per dozen.

Lobelia. Compacta, 25 cts. a doz. From pots, 50 cts. per doz.

Marigold. (Double African). Tall-growing, 25 cts. per doz.

Double French. Dwarf growing, 25 cts. per doz.

Mignorette. Large flowering, 25 cts. doz. From pots, 50 cts. doz.

Nasturtium. Tall or dwarf, 25 cts. per doz. From pots, 50 cts. per doz.

Fansy. An excellent strain, 35 cts. per doz. From pots, 60 cts. per doz.

Petunia. Striped, mottled and flaked, 35 cts. per doz.

Giants of California. 50 cts. per doz.

Palo Verde. Large flowering, mixed colors, 25 cts. per doz.

Salpiglossis. Fine mixed colors, 50 cts. per doz.

Scabiosa. (Sweet Scabious). Double mixed, 25 cts. per doz.

Stocks. (Ten Weeks). Double mixed colors, 25 cts. per doz. From pots, 50 cts. per doz.

Verbena. Mammoth varieties. Mixed colors, 35 cts. per doz. From pots, 60 cts. per doz.

Zinnia. Large flowering, double mixed, 25 cts. per doz.

All annual plants, except those from pots, will be safely sent by mail, postpaid, when so desired.

For \$1.00 we will send, charges prepaid, a collection of 50 mixed annuals containing a selection of early grown plants, that will bloom freely and make a good sized garden, attractive all through the season.

Summer Vines and Climbers.

- Cobaea Scandens.** A rapid growing climber, with handsome bell-shaped flowers. 10 cts. each, \$1.00 per dozen.
- German Ivy.** A rapid growing vine with glossy green leaves; fine for baskets, vases, etc. 10 cts. each. \$1.00 per dozen.
- English Ivy.** Small plants, 15 cts. each. Large plants, 25 cts. to 50 cts. each.
- Madiera Vine.** A well-known rapid growing vine with glossy green leaves and fragrant flowers.
Dry bulbs, 5 cts. each, 50 cts. per dozen.
Started in pots, 10 cts. each, \$1.00 per dozen.
- Othonna Crassifolia.** A good basket plant of trailing habit, with thick fleshy leaves and yellow star-shaped flowers. 10 cts. each. \$1.00 per dozen.
- Moon Flowers.** White and blue. 15 cts. each, \$1.50 per dozen.
- Passion Flowers.** 15 cts. each. Large plants, 25 cts. each.
- Solanum.** 15 cts. and 25 cts. each.
- Lophospermum Scandens.** A rapid climber with rose colored, trumpet shaped flowers. 15 cts. each.
- Variegated Japanese Hop.** The leaves are deep green, distinctly blotched and marbled with white. 15 cts. each.
- Kenilworth Ivy.** A quick growing, trailing plant, valuable for vases, baskets, etc. 10 cts. each.
- Smilax.** A graceful climbing plant with glossy green foliage, much used for bouquets, table and room decorations, etc. 15 cts. each.

Bulbs for Spring Planting.

GLADIOLUS.

Easily grown and free flowering bulbs which should be in every garden. They are of the easiest culture and succeed in any ordinary garden soil. The bulbs can be taken up in the fall and stored in the cellar until spring, when they may be planted again. They are of all imaginable colors, from the bright and dazzling scarlet s. to the soft and delicate pinks, and of many combinations and variations. We have them in two grades.

Extra Fine Named Varieties. 10 cts. each. Collection of 12 distinct named varieties for \$1.00.

Mixed Varieties. Equal to many named collections, all shades and colors mixed. 5 cts. each, 50 cts. per doz.

NEW GIANT FLOWERING.

A new class of Gladiolus of exceedingly strong growth and with enormous flowers of varied and peculiar colors. They are tall and erect, often standing 4 or 5 feet high, with spikes of bloom over two feet in length. They branch freely and in many cases each stem produces three or four bunches. Owing to their great substance, they last a long time before fading. Every color known among Gladiolus is represented in this mixture.

Strong flowering bulbs, 10 cts. each; \$1.00 per dozen.

GROFF'S HYBRID GLADIOLUS.

This new strain is the result of many years' work in the production of which many expensive varieties were procured from all parts of the world, and used without regard to their cost or value. Varieties of Gladiolus are now numbered by thousands, but many of them are of such poor vitality that they are useless except in the hands of a specialist. In the selection of this strain Mr. Groff has discarded everything of doubtful vitality so that the bulbs we offer will produce only strong healthy plants with strong stems and large flowers. The colors and marking are endless, embracing the newest reds, scarlet and crimsons, all shades of white, cream and yellow in many combinations, relieved by stains and blotches of rich colors in most pleasing contrasts, rare blues in clematis, lilac and heliotrope shades and found in no other strain of Gladiolus. These bulbs are offered only in mixture. We offer these in two distinct grades.

GROFF'S GOLD MEDAL AND SILVER TROPHY STRAIN.

This magnificent strain has a world wide reputation and represents the cream of Mr. Groff's creations. It is prepared with the view of providing the amateur with a typical collection of the modern Gladiolus. 10 cts. each, \$1.00 per doz.

Groff's Hybrids. This selection is from the earlier hybrids of Mr. Groff and while not as fine as the preceding, so great is the diversity of coloring, that there is practically no risk of getting any two alike.

Strong blooming bulbs, 5 cts. each, 50 cts. per doz.

Tigridia.

HYACINTHUS CANDICANS.

(Giant Summer Hyacinth.)

A snow-white summer flowering Hyacinth, growing 1 to 4 feet in height, gracefully surmounted with from 20 to 30 pure white, bell-shaped flowers. 10 cts. each, \$1.00 per doz.

TIGRIDIA.

(Shell Flower.)

Summer flowering bulbs, producing large, bell-shaped flowers of handsome colors and beautifully spotted; very free blooming.

5 cts. each, 40 cts. per doz.

Conchiflora. Yellow, with dark spots.

Grandiflora Alba. Pearl white, with crimson spots.

TUBEROSES.

A beautiful and delightfully fragrant summer flowering bulb, and very easily grown. For early blooming they may be started in the hotbed or the house in March and for succession of flowers may be planted every two weeks until July, or they may be planted in the open ground in June.

Excelsior Pearl. Beautiful spikes of double pure white fragrant flowers.

Fine large bulbs, 5 cts. each, 3 for 10 cts., 35 cts. per doz.

Started in pots, 15 cts. each, \$1.50 per doz.

HARDY LILIES.

Plant in the open ground not less than 5 inches deep, the larger kinds deeper. The beds should be underdrained if inclined to be wet. If the soil is heavy or compact, sand or coal ashes should be well worked in the soil to lighten it. Although all are hardy, the beds should be well covered with leaves or manure to the depth of 8 or 10 inches, in the fall.

Auratum. (Gold Banded Lily). One of the most fragrant and beautiful Lillies grown. The flowers are of the largest size, measuring nearly a foot across, of a pure white, with crimson spots, while a band of golden yellow runs through each petal. Strong bulbs, 35 cts. each.

Candidum. (St. Joseph's Lily.) Pure white; very fragrant. Should be planted in September. 10 cts. each. \$1.00 per doz.

Speciosum, or Lancifolium. The most popular Lily grown; of easy culture and producing flowers of delicate colors. 35 cts. each.

Speciosum Album. Pure white, 35 cts. each.

Speciosum Rubrum. White ground, spotted red, with a band of crimson on each petal. 25 cts. each.

Triginum. (Tiger Lily). Orange, spotted black. 10 cts. each.

Select List of Hardy Herbaceous Plants.

This class of plants has become very popular of late years, as when once planted they grow and thrive and increase in value and beauty from year to year. The number of varieties has been so increased that one may, with careful selection, stock the garden with plants which will bloom in succession from early spring until heavy frosts. They are of the easiest culture, only requiring an ordinary garden soil, but as they remain in the ground from year to year, they will be greatly benefited by a mulch or covering of well-rotted manure, through the winter, which should be well worked into the soil around the plants in the spring. We have a fine collection of the best and most suitable for this climate.

We have many varieties not mentioned in the following list, and when customers are in want of varieties for special purposes, such as the wild garden, among shrubbery or for rock work, we would be pleased to submit a list of such as are suited for this purpose, on application, with special prices for large lots.

For those not acquainted with the different varieties we offer collections.

Six distinct varieties for \$1.00, our selection of sorts.

Fifteen distinct varieties for \$2, our selection of sorts.

Twenty-five distinct varieties for \$3, our selection of sorts.

Achillea, the Pearl.

ARABIS ALPINA.

(Rock Cress.)

One of the earliest spring blooming plants and is especially adapted for edging and for the rockery, but will succeed equally well in the border where it forms a dense carpet, completely covered with pure white flowers.

Strong clumps 20c. each.

HARDY ASTERS.

These are among the showiest of our late blooming fall plants and giving an abundance of bloom when all other hardy plants are past, makes them especially valuable for planting among shrubbery, etc.

20 cts. each.

**ANTHEMIS TINCTORI.**

(Hardy Golden Marguerite.)

A valuable plant of easy culture, with beautiful clear yellow flowers, 1 to 2 inches in diameter, borne in abundance from June to October. Fine for cutting. Strong clumps, 25 cts. each.

ACHILLEA, THE PEARL.

A profuse and continuous blooming old garden favorite, with pure white double daisy-like flowers on long stems. Valuable for cutting. Strong clumps, 20 cts. each.

AEGOPODIUM VARIEGATA.

(Variegated Bishop Weed.)

A rapid growing plant with neat green and yellow variegated foliage. It makes a fine border for low shrubbery or for covering waste places. It will thrive in any soil.

Strong clumps 20 cts. each.

ANEMONE JAPONICA.

One of the finest and most beautiful hardy plants. A single plant in moderately rich soil will grow to a height of three feet and two feet in diameter, producing hundreds of their well-formed flowers, commencing in August and continuing until cut down by the heavy frosts. The roots should be covered with leaves or other material during winter.

Alba. Pure white, with yellow center. 25 cts. each.

Rosea. Purplish rose, with yellow center. 25 cts. each.

Queen Charlotte. A grand acquisition. The plants are of a strong robust growth, more vigorous than the older varieties, and commence to bloom much earlier. The flowers are large, two to three inches in diameter, and of a beautiful satin rose color.

Aquilegia.

Whirlwind. A semi-double variety; pure white. 25 cts. each.

ARMERIA.

(Thrift.)

Pretty little plants, forming tufts of bright green foliage, from which are produced numerous bright rosy pink blossoms, on stiff wry stems, from early spring until late in the fall. 20 cts. each.

AQUILEGIA.

(Columbine.)

A popular group of hardy plants with a grace and beauty which never fails to attract attention. We have about a dozen varieties in white, scarlet yellow and blue colors. 20 cts. each.

Chrysantha. (Golden Spurred Columbine). Large canary-yellow flowers, with long spurs; blooms all summer.

BELLIS PERENNIS.

(English Daisy) Double varieties.

White, pink, red, 15 cts. each.

\$1.50 per doz.

Chrysanthemum. (Inodorum Plenissima) Fine green fern like foliage, flowers very double, snow white and borne in immense panicles; fine for cutting. 20 cts. each.

CLEMATIS RECTA.

A robust hardy plant growing to a height of 3 to 4 feet and completely covered in June and July with very large panicles of small fragrant white flowers. 20 cts. each

Chrysanthemum.

CAMPANULA (Bellflower.)

Elegant and useful plants of the easiest culture, with handsome bell-shaped flowers of rich colors, produced in abundance.

Double and single, various colors, hardy biennials, 20 cts. each.

Latifolia. Grows about 3 feet high and produces purplish-blue flowers through July and August.

Latifolia Alba. Similar to the above, except in color, which is pure white.

Persicifolia. (Peach Bells). An elegant variety growing 18 inches to 2 feet in height and producing an abundance of blue salver shaped flowers in June and July.

Persicifolia Alba. A pure white form of the above.

Media. (Canterbury Bells). An old-time favorite, completely covered during July with large bells of various colors.

COREOPSIS LANCEOLATA.

One of the best hardy plants. Large golden yellow flowers on long slender stems, produced in abundance all through the season. very hardy and will thrive in any situation. Strong clumps, 20 cts. each.

DELPHINIUM.

(Perennial Larkspur.)

Formosum. A stately and attractive plant, growing to a height of 4 to 5 feet. Its long spikes of bright blue flowers are produced continually all summer. 25 cts. each.

Coelestinum. A beautiful variety, with pale blue flowers. 25 cts. each.

GAILLARDIA GRANDIFLORA.

One of the most satisfactory hardy plants grown. The flowers are shaped like a small, single sunflower. The center of flower is a brownish red, with a ring of brilliant scarlet-crimson at base of petals, the ends orange yellow. This combination of colors produces a gorgeous effect. Very free blooming from July till frost. One of the finest flowers for cutting. 25 cts. each.

HELENIUM AUTUMNALE.

A valuable, hardy perennial, growing 3 to 5 feet high, with immense heads of bright golden, star-shaped flowers, produced in abundance in autumn. 25 cts. each.

HELIANTHUS.

(Double Perennial Sunflower.)

Multiflorus fl. pl. A useful and beautiful hardy plant, growing about 4 feet high, and producing large, golden-yellow flowers as large and well-formed as a good show Dahlia. Very free, blooming from July till heavy frost. An excellent flower for cutting. Strong clumps, 25 cts. each.

Maximiliana. A handsome and graceful single-flowered variety, with beautiful, large yellow flowers in graceful sprays. 20 cts. each.

LAWRANCE'S FINE DOUBLE HOLLYHOCK.

Hollyhocks.

Our selections of this most effective old hardy garden plant are unsurpassed. For many years this has been a specialty with us, annually buying seed from the best growers in this and European countries until we now have a collection that is perfection in form, large size and handsome colorings. We do not offer pot plants, but strong field grown roots that will bloom the first season. We have them in separate colors. White, yellow, pink, crimson and variegated. 15 cts. each, \$1.50 per doz.

Fringed Alleghany. This grand new Hollyhock is a decided improvement over the old fashioned variety, being almost a perpetual bloomer. The flowers are mostly double and semi-double, although a small percentage come single. The flowers are nicely fringed which gives them a very graceful appearance. 15 cts. each \$1.50 per doz.

GERMAN IRIS.

This interesting group of hardy plants is remarkable for their quaintly marked and curiously constructed flowers. They are of the easiest culture and may be planted in low wet places. They flower abundantly in June. We have a fine collection in many different varieties. Strong roots, 20 cts. each, \$2.00 per doz.

JAPAN IRIS.

(Iris Kempferii.)

A magnificent class, differing from the ordinary kinds by blooming a month later and having very broad large flat blooms. They delight in a moist rich soil, and bloom abundantly. We have a fine collection which were imported direct from Japan. Strong roots, 25 cts. each.

PAPAVER OR HARDY POPPY.

Oriental. (Oriental Poppy). Undoubtedly the showiest and most striking hardy flower grown. The flowers are 4 to 6 inches across, of a bright scarlet color, with black blotch at base of each petal, and borne on stems 2 to 3 feet long. 20 cts. each.

Nudicaule. (Iceland Poppy). A beautiful, dwarf-growing hardy Poppy, with fern-like foliage. The flowers are cup-shaped, and borne on slender stems, a foot in length. They bloom continually from early spring until heavy frosts. A fine flower for cutting. We have them in separate colors, white, orange, scarlet and yellow. Plants from pots, 15 cts. each, \$1.50 per doz.; clumps, 20 cts. each, \$2.00 per doz.

PAEONIES.

Herbaceous Varieties.

This noble flower, so brilliant in color and perfection of bloom, almost rivals the rose, increasing in beauty and form from year to year. The plant is of good form and outline, as hardy as a dandelion and as sure to bloom. I have a large bed of them in the new and old varieties, which are a beautiful sight when in bloom. The cut-blooms are very popular, and sell at 50 cts. to \$1.00 per doz. Many of them are fragrant.

Strong plants, 35 cts. each, \$3.50 per doz., except where noted.

Agida. Rich glowing dark red.

Alba plena. Large, double white; fragrant.

Bicolor. Outside petals pink, center lighter, stained red.

Faust. Fresh color, shaded.

Festiva Maxima. The finest and largest white in cultivation. It is perfection in form and free blooming qualities. 75 cts. each.

Festive Alba. Large pure white.

Fragrans. Deep rose; fragrant and late.

Grandiflora carnea plena. Outside petals blush, center yellowish; fringed.

Humel. Large, double; purplish rose; very late, lasting two or three weeks longer than other varieties.

Limbata. Clear pink, very fine.

Lutea variegata. Semi-double; yellowish white; flesh guard petals.

Modesta. Deep rose, bright and showy; very large and fine shape; fragrant.

Officinalis Rubra. The old double red Piney. One of the earliest and best.

Officinalis Alba. Large double white, tinged with red, very fine.

Pottsii. Deep rose; early.

Plenissima rosea superba. Guard petals rose, center blush.

Queen Victoria. Pure white occasionally marked with small flakes of red on edge of petals.

Tenuifolia plena.

Rosea Superba. Large; deep rose, shading lighter to center.

Rubra Triumphans. Dark purplish crimson single flowers; very early.

Tenuifolia. Fern-like foliage, with dark crimson single flowers; very early.

Tenuifolia plena. Similar to the above with double flowers the color and form of "Jack" roses 75 cts. each.

Victoria tricolor. Outside petals pale rose, center yellowish white, streaked red.

Variegata plenissima. Flesh color, with pink guard petals.

PAEONY ARBOREA.

(Tree Paeony.)

Handsome flowering shrub. The flowers are numerous and of immense size. Although hardy, the plants must be protected in this climate. \$1 each.

PHLOX.

(Flame Flower.)

This, like the Paeony, is a flower for the millions—something everybody can grow—and should be in every garden. It is of stately growth and vigorous habit. The flowers are of fine form and colors, and are produced in profusion during a long season. We have a first-class collection which consists of only varieties of distinct and decided colors. Our plants are strong field grown, and not to be compared with the small greenhouse propagated plants, usually sent out.

Price, 20 cts. each, \$2.00 per doz.

Beranger. Ground color white, delicately shaded with rosy pink, amaranth red eye.

Bridesmaid. White with large cherry red eye. A fine large flower and truss.

Coquelicot. Very fine scarlet with crimson eye.

Bouquet Fleur. Pure white with crimson eye, large flowers and trusses.

Champs Elysee. A very pretty shade of rosy magenta.

Eclairieur. An excellent variety with brilliant rosy magenta flowers.

Jeanne d'Arc. A fine late blooming white.

Offenbach. Bright rose with large white eye.

M. Gladstone. Soft rose, large flowers.

Pantheon. Bright carmine rose.

Percheur d' Island. Carmine shaded with salmon red, bright starry eye.

R. P. Struthers. Bright rosy red with crimson eye.

Wm. Robinson. A very showy variety, crimson shading to salmon scarlet.

PHLOX SUBULATA.

(Moss Pink.)

A dwarf variety, growing closely to the ground, and forming a carpet of moss-like foliage, which is completely covered with pink flowers in early spring. Also *P. subulata alba*, a pure white form of the above. Strong clumps of either, 20 cts. each.

Phlox Amoena. One of the best low growing plants for borders, or rockery growing about four inches in height and covered in early spring with a sheet of rich pink flowers. 20 cts. each.

PHYSOSTEGIA.

Fase Dragon Head.

One of the most beautiful of our midsummer flowering perennials forming dense bushes, 3 to 4 feet high, bearing spikes of delicate tubular flowers, not unlike a giantic heather.

Virginica. Bright pink.

Alba. Very fine pure white.

HARDY RUDBECKIA GOLDEN GLOW.

A grand new hardy plant which should be in every garden. It is more elegant and beautiful than the double sunflower (*Helianthus multiflora*). It is of strong, vigorous growth, attaining a height of about 9 feet. The flowers, which are a beautiful golden yellow, very double, from 4 to 6 inches in diameter, and are produced on long, stiff stems, which, combined with its beautiful foliage, makes it excellent for cut flower purposes. An early and continuous bloomer.

Strong blooming plants, 25 cts. each, 3 for 50 cts.

Shasta Daisy.

SHASTA DAISY.

The largest and finest of all the moonpenny daisies. It is the first of a new type and among its many good qualities are extreme hardiness, standing over severe winters without protection, adaptability to any and all soils, and freedom of bloom, blooming all through the summer and fall. The flowers are large and graceful, averaging 4 inches across with petals of pure glistening whiteness and yellow disc. On account of its long stems and extraordinary keeping qualities when cut, no other flower can compare with it in usefulness.

25 cts. each.

\$2.00 per doz.

SPIRAEA.

Valuable and well-known herbaceous plants of easy culture, with handsome foliage and graceful, feathery flowers. 20 cts. each.

Filipendula Flera Plena. Large corymbs of white flowers and pretty, fern-like foliage.

Lobata. A robust variety, with deep, rose-colored flowers in large heads.

Ulmaria fl. pl. A beautiful variety, with handsome foliage and large panicles of creamy white double flowers.

Japonica. Pure white flowers and glossy green foliage.

General List of Hardy Herbaceous Plants

Aconitum. (Monkshood). A stately growing plant, 3 to 6 feet high with showy purple flowers in large panicles in August and September. 20 cts. each.

Armeria. (Thrift or Sea Pink). Compact, cushion-like plants, with pink flowers produced in abundance an excellent plant for bordering, etc. Strong clumps, 20 cts. each.

- Asclepias Tuberosa.** (Butterfly Weed). One of the showiest perennial plants grown. Large umbels of blue and orange flowers; very showy and effective. 20 cts. each.
- Astilbe Japonica.** A handsome plant, with pretty feathery white flowers in May. 20 cts. each.
- Boltonia Latisquama.** A showy and beautiful perennial, blooming in late summer and fall. Handsome single aster-like flowers on long, wiry stems; color: rosy lilac; strong clumps. 20 cts. each.
- Hardy Garden Carnation.** We have a splendid strain, all colors mixed. 20 cts. each, \$2.00 per doz.
- Campanula.** (Bellflower). Elegant and useful plants of the easiest culture, with handsome bell-shaped flowers of rich colors produced in abundance.
- Dictamnus.** (Gas Plant). A showy hardy plant, forming a neat bush about 2 feet high, and bearing spikes of red and white flowers of a peculiar fragrance; either color. 25 cts. each.
- Dielytra.** (Bleeding Heart). A well-known and beautiful hardy plant, with curiously formed rosy crimson flowers on drooping stems. 20 cts. each.
- Digitalis.** (Foxglove). An old garden favorite and among the best of all plants for planting among shrubbery and in shady situations. 20 cts. each.
- Funkia Alba.** (Plantain Lily). A beautiful hardy plant, with handsome green foliage and fragrant pure white lily-like flowers, in large clusters. 20 cts. each.
- Funkia Coerulea.** Light blue, 25 cts. each.
- Gypsophila Paniculata.** (Baby's Breath). An old fashioned perennial plant forming a dense mass of very small pure white flowers, on large loose panicles, giving it a mist-like appearance. Fine for cutting purposes in combination with other flowers. Strong clumps. 20 cts. each.
- Helioopsis.** (Pitcherianus). A desirable hardy plant, with beautiful golden yellow flowers 2 inches in diameter, blooming continually all through the season. Growth, 3 feet. 25 cts. each.
- Hemerocallis Fulva.** (Lemon Lily). A handsome and useful plant, with large lily-like flowers of a lemon-yellow color, on long stems. 25 cts. each.
- Hibiscus.** (Rose Mallow). Valuable border plants, with large, showy rose-colored flowers in August. Growth, 4 feet. 25 cts. each.
- Inula Ensifolia.** A perfectly hardy plant with narrow foliage growing about one foot high, and completely covered in July with large yellow daisy like flowers. 20 cts. each.
- Liatris.** Very showy and attractive plants, producing large spikes of rosy purple flowers a peculiar feature of which is the flowers on the top of the spike open first. 20 cts. each.
- Lily of the Valley.** The well-known old hardy garden plant. Strong clumps, 20 cts. each.

LYCHNIS.

- Chalcedonica.** An old garden favorite, with trusses of brilliant scarlet flowers; on long stems.
- Haageana.** A showy variety, growing about 1 foot high, with striking flowers of all shades and colors.

Plenissima Semperflorens. A valuable addition to the list of hardy perennial plants on account of its extraordinary freedom of bloom. The flowers are of a beautiful rose color, and produced on long stems in large, loose clusters. It commences to bloom early in spring and continues throughout the entire summer. The plants may be potted in the fall, and if kept in a cool, light room, will produce an abundance of flowers, during the whole winter. 25 cts. each.

Viscaria. (Ragged Robin). An early flowering variety with beautiful, deep red, double flowers, on long stems.

Viscaria Alba Plena. Large, pure white, double flowers, produced in abundance all summer.

20 cts. each, except where noted.

Myosotis. (Forget-me-not). The well-known beautiful little plants with star-like flowers of a beautiful azure blue color. 20 cts. each.

Platycodon. (Japanese Bell Flower). Beautiful perennial plants with large blue and white bell-shaped flowers, produced in abundance from spring until fall. 20 cts. each.

NEW

GIANT

HARDY

PRIMROSE.

A true giant variety of the old fashioned Hardy English Primrose, being three times the size of the old variety, the average size of the individual florets being over one inch in diameter. It is perfectly hardy, grows about one foot in height and begins to bloom earlier and continues in bloom longer than any variety of the same family. It has the delicate, yellow color and the fragrance of the old English Primrose.

Strong plants 20 cts. each.

Giant Hardy Primrose.

Pyrethrum Ulginosum. A fine autumn-blooming perennial, growing to a height of 3 to 5 feet, and producing large sprays of single white flowers, with yellow center, resembling daisies, but much larger. Fine for cutting. An excellent companion plant to *Helenium autumnale*, both blooming at the same time. 20 cts. each.

Pinks, Hardy Scotch. Hardy dwarf pinks, large double fragrant flowers of rich color. 20 cts. each.

Pink, Her Majesty. A beautiful variety with large pure white flowers on long stems. 20 cts. each.

Ranuncius. Double yellow Buttercup or Bachelor's Button. 20 cts. each.

- Thyme.** (New Golden). A handsome form of the Lemon Thyme. Foliage green, tipped with golden yellow. A fine plant for edgings, etc. Large clumps, 20 cts. each.
- Tritoma.** (Hed Hot Poker.) Splendid plants, with flower stalks 4 to 5 feet high, with orange and scarlet tubulous flowers for a foot or more of its length. Should be wintered in a cool cellar. 35 cts. each.
- Valeriana.** (Garden Heliotrope). Flowers bluish white, in large trusses. Useful for cutting. 20 cts. each.
- Veronica.** (Speedwell). A good hardy perennial, with erect spikes of flowers, a foot or more in length. White and blue. 20 cts.
- Vinca Minor.** (Periwinkle, or Myrtle). A trailing evergreen plant with blue flowers. 20 cts. each.
- Hardy English Violet.** A valuable variety; perfectly hardy. Very free-blooming and deliciously fragrant. Large double flowers. Young plants from pots, 15 cts. each; clumps, 25 cts. each.
- Hardy Russian Violet.** A very hardy variety of a deep blue color. Very fragrant and free-blooming. Plants from pots. 15 cts. each; clumps, 20 cts. each.
- Yucca Filamentosa.** (Spanish Bayonet.) These present a grand appearance, planted on the lawn and liberally supplied with water. Large pendant, bell-shaped, white flowers on spikes 2 to 3 feet high. 50 cts. each.

Hardy Vines and Climbers.

AMPELOPSIS.

Quinque folia. (Virginia Creeper). One of the finest vines for covering walls, trunks of trees or any unsightly object. The foliage becomes rich crimson in autumn.

Strong plants, 20 cts. each, \$1.50 per dozen.

Veitchii. (Boston Ivy). One of the handsomest clinging vines in cultivation. The leaves are three lobed and overlap one another, forming a dense sheet of green, changing to rich crimson in autumn. The plant is tender when young and should be protected the first two or three years.

Strong plants, 35 cts. each.

ARISTOLOCHIA SIPHO.

(Dutchman's Pipe Vine.)

A strong, rapid growing climber, with very large light green leaves, 8 to 10 inches in diameter, which retain their color from early spring until late fall. The flowers are of a peculiar brownish color, and resemble in shape a crooked stem pipe.

Strong plants, 60 cts. each.

CLEMATIS.

These are among the most beautiful and satisfactory plants grown. They can be used in almost any situation, either on arbors, verandas or trellises, but to be seen to the best advantage they should be trained to individual trellises in the garden; they require a rich soil, and should be mulched with well rotted manure every spring to give the best results. Although hardy they will be benefited by covering in fall.

Coccinea. Curlous thick petaled bell-shaped flowers of a bright scarlet color, borne in abundance all summer.

25 cts. each.

Henryi. Very large flower; creamy white. One of the best.

50 cts. each.

Jackmanni. An abundant and successive blooming variety, of rapid growth, with large, violet-purple flowers. A general favorite.

Strong plants, 75 cts. each.

Lanuginosa. Large, light lavender; very early.

50 cts. each.

Mad. Ed. Andre. A distinct and novel variety, being the nearest approach to a bright red yet sent out. The plant is a strong, vigorous grower, resembling Jackmanni in freedom of bloom, size and shape of flower, but is a beautiful shade of carmine-red in color—a most pleasing shade.

75 cts. each.

Mad. Baron Viellard. Another unique color in the Clematis. Handsome lavender pink; large flowers, freely produced.

75 cts. each.

Clematis Paniculata. A valuable new variety from Japan, and one of the most satisfactory hardy climbing plants grown. It is of very rapid growth with beautiful glossy deep green foliage, and small pure white star-shaped flowers which appear in great profusion in August and last until late in the fall. The plants succeed in almost any situation and will be found very useful for covering trellises, verandas, etc., or allowed to run over sloping banks among rock work, etc., the effect is beautiful.

Strong roots, 50 cts. each.

Virginiana. Small, white flowers in dense masses; will grow rapidly in any situation.

25 cts. each.

CLEMATIS--Jackmanni.

HARDY
MOON
FLOWER.

Ipomea
Pandurata.

A very rapid growing vine, which after becoming established grows to a height of thirty to forty feet. The vines branch freely and form a dense mat or screen thickly covered with large green heart-shaped foliage. The flowers white, shading through pink to purple in the throat and resemble large Morning Glories.

Strong roots 20
cts. each.

Hardy Ornamental Shrubs.

- Berberis. (Barberry) Vulgaris.** A handsome native shrub, with racemes of yellow; fragrant flowers, followed by scarlet fruit. 35 cts. each.
- Berberis Thunbergii. (Barberry).** A beautiful dwarf variety from Japan. The foliage is small and assumes a great variety and beautiful tints of coloring in the autumn. Very desirable for grouping and a grand hedge plant. 35 cts. each.

LILAC.

Syringia Vulgaris.

- Vulgaris. (Common Lilac).** Bluish purple flowers. 35 cts.
- Vulgaris Alba. (Common White Lilac).** Very fragrant. 35 cts.
- Josikaea.** A fine distinct species, from Transylvania. Of tree-like growth, with dark, shining leaves; flowers, purple, and produced in June, after all other lilacs have done blooming. 50 cts. each.
- Persica. (Persian Lilac).** An excellent species, with small foliage, growing 4 to 6 feet high. Large panicles of purple flowers freely produced. 35 cts. each.

Purple Fringe or Smoke Tree. A desirable shrub; much admired for its curious fringe-like flowers, that cover the whole plant, becoming like a cloud of smoke later in the season. 35 cts. each.

Syringa or Mock Orange. A desirable shrub, of vigorous habit, with fine, rich green foliage and beautiful white fragrant flowers, in dense clusters, in such profusion as to bear the branches down when in flower in June. 35 cts. each.

HYDRANGEA PANICULATA GRANDIFLORA.

This is the most popular hardy shrub of the day, and one of the easiest to grow. It does well in any and all soils, but the flowers will be larger and finer if given good, rich soil. The flowers are in immense panicles, creamy white when first opening, changing to pure white when fully open then turning to pink and bronze as the flower grows older. It blooms in August, and remains in bloom until heavy frosts. At least half of the previous year's growth should be cut back each spring, as the flowers are much larger and finer when treated in this manner. We have a fine stock of extra strong plants at 50 cts. each, \$4 per dozen; smaller plants, 25 cts. and 35 cts. each, \$2.50 and \$3.50 per dozen.

Hydrangea Paniculata Grandiflora.

SPIRAEA.

(Meadow Sweet.)

Fine medium-sized shrubs of easy culture, and very hardy.

Anthony Waterer. A valuable and distinct variety of dwarf dense growth. The flowers are bright crimson and are freely produced all through the summer.

Van Houttei. Undoubtedly the finest variety in cultivation. Flowers pure white, in dense clusters the whole length of the branches which are often weighed to the ground with the weight of flowers. 35 cts. each.

Vegetable Plants.

We have a large amount of space devoted to growing Vegetable Plants in such varieties as are of the greatest merit and best adapted for planting for the home garden or market. Much time may be saved in getting plants well established and ready to grow as soon as the ground is in proper condition to plant. We give careful attention to packing for shipment, in order to insure safe arrival and low rates.

Brussels Sprouts. Improved Half Dwarf. Very hardy plants, producing numerous little sprouts resembling small cabbages. They should be treated in all respects like winter cabbage. Plants ready after June 1st, 10 cts. per dozen, 60 cts. per hundred.

Cabbage Plants. Early Winningstadt, Early Jersey Wakefield, Succession, Flat Dutch, Danish Ball Head, Short Stem Drumhead, Red Dutch, &c. Early varieties transplanted 8 cts. per doz., 50 cts. per hundred. After June 1st all varieties 25 cts. per hundred, \$2.00 per thousand.

Celery Plants. White Plume, Golden Self Blanching, Silver Self Blanching, Winter Queen, Giant Pascal. Ready after May 20th.

Prices of Celery Plants. (By express only, at Buyer's expense.)

Plants from Seed beds.....\$3.50 per 1000; 50c. per 100.

Transplanted Plants\$6.00 per 1000; 75c. per 100.

The superiority of Transplanted Plants is seen in the dense mass of fibrous roots they possess, and on this account they are much easier to make grow and more certain to do well.

Cucumbers, Melons and Summer Squash. The leading varieties, 15 cts. each, \$1.50 per dozen. These are grown in patent boxes which can be removed without disturbing the roots when planting in the hill.

Egg Plants. New York Improved, Early Dwarf, Purple, &c. Large plants grown in pots, 15 cts. each, \$1.50 per dozen. Transplanted 50 cts. per dozen.

Onion, Mammoth Prize Taker. Fine plants from seedbed, 15 cts. per 100, \$1.25 per 1000.

Everyone should try a few hundred of these. If given rich soil and good cultivation, onions may be raised weighing a pound or more apiece.

Peppers. Bull Nose, Long Red, &c. Transplanted, 25 cts. per dozen, \$1.50 per 100.

Parsley Plants. Moss Curled, 25 cts. per dozen.

Tomato Plants. Livingston's Beauty, Sparks' Earliana, Ponderosa, Early Jewell, Dwarf Champion, Stone, Matchless, &c. Transplanted, 25 cts. per doz., \$1.50 per 100. Large strong plants in patent plant boxes, which can be removed without disturbing the roots, 60 cts. per doz., \$4.50 per 100.

SPECIAL ATTENTION IS CALLED TO THE TOMATO PLANTS IN PATENT BOXES. BY PLANTING THESE RIPE TOMATOES CAN BE HAD FROM ONE TO THREE WEEKS EARLIER.

Rhubarb (Pieplant) Linnaeus. The best variety, very tender, juicy and of superior flavor. Strong roots, 20 cts. each, \$2.00 per doz.

SAGE.

Molt's Mammoth. A large leaved strong growing variety which never rims to seed, 10 cts. each, \$1.00 per dozen.

ASPARAGUS ROOTS.

Connover's Colossal. The standard variety. The stalks are very large, tender and succulent; very quick growing and free from woody fibre.

Strong plants, 1 year old roots, 75 cts. per 100.

Strong plants, 2 year old roots, \$1.50 per 100.

ALL VEGETABLE PLANTS SHIPPED BY EXPRESS UNLESS OTHERWISE ADVISED.

Cut Flowers and Floral Designs.

AT ALL SEASONS.

For many years we have devoted a large amount of space to the growing of choice flowers, making them up when so ordered, into designs suitable for all purposes. They can be safely shipped long distances at all seasons. We pack with great care, and of the hundreds of designs sent out, have never heard of one arriving in bad order or failing to please. Prices vary according to season, scarcity of flowers, work expended, etc.

The prices of cut flowers are governed by count mostly, varying somewhat with the season. In summer flowers do not average as choice and as expensive as in winter, and during the Christmas and Easter holidays they are most expensive, being apt to be nearly double common prices at other times. We give below a list with prices of staple kinds in their respective seasons.

Per dozen prices are given except where noted:

ROSES	Nov. to April (except holidays) also Easter	Holidays Dec. 20 to Jan. 5	April to October, inc. except Easter

SPECIAL ATTENTION GIVEN TO DESIGNS OR EMBLEMS
FOR FRATERNAL AND OTHER SOCIETIES.

WEDDING AND OTHER DESIGNS.

Marriage Bells. \$8.00 and up.

Horseshoes. \$3.00 to \$10.00.

Bridal Bouquets. We give special attention to making these in the latest and most fashionable styles. They are usually made of white roses, lily of the valley, sweet peas, chrysanthemums or other seasonable flowers. We make these in the ordinary bouquet form at \$2.00 to \$15.00 each, according to material and finish. We also make them in the new shower form at \$5.00 to \$25.00 each. This is the new and popular arrangement in which small ribbons are freely used to droop from the flowers. Tiny bows are used and light flowers entwined among the ribbons.

Bridesmaid Bouquets. \$2.00 to \$10.00 each.

Baskets of Flowers. In plain or fancy baskets, for weddings, commencements, etc. \$1.50 to \$10.00 each.

Ladies' Corsage Bouquets. 50 cts. to \$2.00 each.

Gentlemen's Boutonnieres. 15 cts. to 30 cts. each.

Loose Flowers. In boxes suitable for presenting to a sick friend, etc. \$1 and upwards.

Smilax. 25 cts. per string of 4 to 6 ft.

FERTILIZERS.

Bone Meal. A safe and valuable fertilizer for all plants. 1 lb., 10 cts.; 5 lb. package, 35 cts.; 10 lb. package, 50 cts.; 100 lb. bags, \$3.00. Price by the ton, on application.

Nitrate of Soda. A valuable fertilizer on account of the nitrogen it contains. It is quick in action and makes the mineral plant foods in the soil more available. For pot plants and small gardens it should be used in solution, $\frac{1}{2}$ oz. to 1 gallon of water. For field use, it should be mixed with sand or land plaster, and applied at the rate of 200 to 500 lbs. to the acre. 1 lb., 10 cts.; 10 lb. packages 60 cts., 100 lb. bags \$3.75. Price by the ton, on application.

INSECTICIDES.

SULPHO-TOBACCO SOAP

A Wonderful and Inexpensive Insecticide

Sulpho-Tobacco Soap is a powerful agent for the destruction of all bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Destroys cabbage, squash- and potato-bugs, currant-worms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit-trees and vines.

3-oz. Cake makes 1½ gallons prepared solution **10 cents.**
Mailed, postpaid, for **13 cents.**

8-oz. Cake makes 4 gallons prepared solution. **20 cents.**
Mailed, postpaid, for **28 cents.**

10-lb. Cake makes 80 gallons prepared solution. **By Express, \$3.00.**

Free with every order, "The Window Garden," a booklet by Eben E. Rexford, giving valuable information on the cultivation of plants and the extermination of insects.

Tobacco Dust. For destroyin' green and black flies, squash bugs, etc. should be dusted on foliage. 10 cts. per lb., 10 lb. package 60 cts.

Hammond's Slug Shot. An insecticide of great value, in the form of a fine powder. Very effective in destroying potato bugs, cut worms, squash bugs, cabbage worms, etc. Full and explicit directions for use on each package. It is entirely harmless to man or animal, but very efficient as an insect destroyer. 5 lb. package 25 cts., 10 lb. package 50 cts.

Flower Pots, Standard. All sizes, very cheap. Write for prices on any size you want.

Rustic Hanging Baskets. Filled with plants, \$1.50 to \$3.00 each.

Glazed Earthenware Hanging Baskets. Filled with plants, 75 cts. to \$1.50 each.

Potting Soil. 50 cts. per bushel; 25 cts. if taken at the garden.

Pot Labels. 4 inches long, painted, 15 cts. per hundred.

Raffia. A splendid tying material for plants, or bunching green vegetables. So soft it does not cut, yet so strong it may be split to the finest fiber. 25 cts. per lb.
